WELCOME

Author, lecturer James Quinn first dubbed our efforts as "The Sartin Methodology" in a Gambling Times Article, then applied the term again in his book: "High Tech Handicapping in the Information Age." Thanks to him the name has stuck, thus identifying and separating us from other handicapping procedures. In the beginning our efforts centered on pace velocities, class and form cycles. Quinn himself branded ours as a method applying precise incremental velocity (speed) figures to the totality of a thoroughbred race. From 1975 through 1982 this was the case.

In 1983, with the publication of FACTOR ANALYSIS, Part I, we introduced the concept of ENERGY as arbitrarily defined by us giving it a meaning not subject to dictionary definitions. It had become apparent after a number of opportunists jumped on the pace velocity bandwagon that in order to stay at least five years ahead in this field we had to reach beyond pure pace velocity. We did so first through ULTRASCAN; followed by a revised Phase III procedure that embraced energy. We incorporated Energy into both programs in a Technical Paper presentation for Handicaping Expo '84. It exceeded the boundries of conventional handicapping procedures to a degree that only a handful of the attendees at that gathering were drawn to it. One was Dr. Wiliam Quirin, another was James Quinn. Of the 89 handicappers attending our session 23, became clients. The other 66 remained speed or class handicappers helping to keep our mutuel prices high.

This seminar will focus on ENERGY so that when we all leave it will be clearly defined for all to apply

VELOCITY/ENERGY

VELOCITY: RATE OF SPEED RELATIVETO DISTANCE.
ENERGY: SYNERGETIC COMPOUNDING OF TWO OR MORE VELOCITIES INTO MATHEMATICAL FORMULAE WHICH INCLUDE ADDING, SUBTRACTING, DIVIDING AND MULTIPLYING.
PACE RELATIONSHIPS
WEIGHTED PACE RELTIONSIPS TO INCLUDE FACTORS OF VARIANT.

All of the readouts on the preceeding page with an X next to them represent ENERGY. Only the the three fractional times, the second call and True Speed reflect Velocity numbers. The key to success with the Methodology lies far more in ENERGY than in raw velocities. As Energy becomes more and more refined it gives clearer meaning to velocitiy and finally supercedes it with synergetic values that are optimally predictive.

While the conventional handicapper may consider the use of PAR TIMES as State of The Art, we find that employing PAR ENERGY is more advanced because it overcomes the narrow confines of time by translating combinations of times into a less exacting yet more prescise measurement.

MAJOR DEVIATION *

The major deviation in PIALOH'S Early Energy Expenditure (54.13%) is explained by the fact that it ran the 2nd call considerably faster than par at this level. It ran away with the race, leading by 4 lengths with a 44.2 Second call. Whenever you see a deviation of this kind, LOOK to see HOW the race was run. If abnormal, like this one, do NOT use the Early Energy % in your

HANDICAPPING WITH ENERGY

by Jim "The Hat" Bradshaw

If I was forced to select one track to play and the time to play it, I would select Oaklawn Park on opening weekend. Not because it is an easy track, but because of the profit that can be made using the Sartin Methodology. Oaklawn Park is a rather difficult track to handicap because it is a un-biased track, horses are shipping in from all over the country and a large percentage of the horses are coming off layoffs. The mutuels are always high because there are very few sophisticated players at this meet. Most of these players bet on jockeys, names, trainers, "good old Oaklawn horses," and many other whims. You can always get a tip because everyone always knows someone that knows someone who knows something.

After handicapping and winning the sixth race, I felt rather smug until a lady informed me she also had the horse and that it was rather easy to handicap. The horse's name was MARISA. She said: "My name is Maria, so I just took the "s" out of MARISA and put $10 across on her." The horse paid $97.00. Maybe we should add this to the Sartin Methodology.

I don't have to look at my calendar to know when opening weekend is drawing near, because I start getting calls from "good ol' boys" I haven't heard from in 8 months wanting to go to the races with me or tips. Many of the Sartin Methodology users now suddenly want help because they haven't handicapped since Oaklawn closed last April, and Tulsa is buzzing with anticipation of the great event.

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

I usually attend opening weekend with my buddy, Don Jones and a few other friends, and we look like a parade as we enter the track. I'm easy to spot with my hat and my entourage, so many of the "good ol' boys" gather 'round wanting me to give them my picks. I always tell them that I handicap between the races, because nights are for eating, drinking and chasing cowgirls. (Editor's note: Not necessarily in that order.) Nevertheless, Jonsey marks their program using the top jockeys and Randy Moss's selections and they leave happy.

As I prepare to handicap the races, I dig deep into the repertory of information provided by my pal and "guru" Howard Sartin. Usually I haven't done much handicapping in over three months and I'm anxious to get started. Faced with shippers and lay-off horses, I cannot rely on the match-up entirely, and I know that Energy and Energy exertion is the best way to handicap these races. Using Energy, I was able to hit over 80% winners on the first three days of the Oaklawn meet. Here are a few of the races I handicapped, together with an explanation of what I think is critical when playing Oaklawn opening week. In looking over these races, you will see why it is important to play two horses in each race. Oaklawn Park does not have exotics, so money must be made on straight bets.

RECENCY - Recency must be ignored in most cases because many of the horses are coming off lay-offs and most of them have been working like bandits anyway.

PACE LINES - In selecting pace lines, I look at each horse and match them with an established par for this race. Most of the lines are taken from races where the horses ran against pace lines similar to what they will face today. This prevents entering

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

slow horses into the computer, horses that have no chance in today's race. You'll also always wind up with the true contenders in each race. This is the only time of the year I use so many contenders and rely as much on my computer.

TRACK PROFILE - The track profile is made from the race that is being worked, and the horses are adjusted to a meridian Energy par. The only time the race is not adjusted is when all the horse's Energy figures are within .72 of each other.

MODEL - A race model is established from the "race profile." This gives me a clue on how the race is going to run and and average % Early Energy exertion is used as par for the race.

From the examples, you can see the importance of Energy and Early Energy exertion when the concept is understood. In the first four days of the meet, only three favorites won and the report in the newspaper's Trend of Racing stated that the only trend is that favorites are not winning and now they are due. I doubt if the horses know when they are the dang favorite or not, and this type of thinking is what makes opening at Oaklawn Park my favorite time of the year, thanks to my pal Doc Sartin. THANKS DOC.

ENERGY PARS-TOTAL/%EARLY

WHILE JIMMY CITES OAKLAWN AS A NO-BIAS TRACK IT STILL HAS EARLY ENERGY % PARS. THIS IS HIS FIRST ENTRY IN "CONTRASCAN"AND ESTABLISHES THE READOUT LABELED "WIN BIAS" WHICH SUPERCEDES CONVENTIONAL READOUTS FROM BOTH PHASE III AND ULTRASCAN. PREDICTING "MY MARISA" IN THE 6TH RACE IS A PRIME EXAMPLE. HERE'S ANOTHER LOOK AT HOW IT WORKS. "FFF" SEEMS THE FIRST CHOICE IN ALL CATAGORIES EXCEPT "WIN BIAS." WHICH TAKES PRECEDENCE OVER ALL IN THE ENERGY PROGRAM.

LONG SHOTS/SHORT PRICES

AN EFFECTIVE PROGRAM MUST GET BOTH WITH EQUAL REGULARITY.

OVER 12 YEARS WE HAVE AVERAGED 5 DOUBLE DIGIT MUTUELS PER 20 RACES; WITH 1 BEING OVER $28. HOWEVER THERE WILL BE PERIODS WHEN LOW ODDS HORSES ARE WINNING VIRTUALLY ALL OF THE RACES YOU MUST UNDERSTAND AND ACCEPT THIS PHENOMENOM, LEARNING TO OPTIMIZE THE PROFIT POTENTIAL FROM LOWER MUTUELS. THE ONLY ALTERNATIVE IS EXTREME PATIENCE & SELECTIVITY-WHICH FEW POSSESS

LEST YOU THINK JIM "THE HAT" A MIRICLE WORKER, HERE IS ONE OF HIS SHORT-PRICED DAYS AT THE VERY SAME TRACK. THE MORAL IS HE HANDICAPS WITH EQUAL INTENISITY FOR $4 HORSES AND $97 HORSES.

Saturday's Results at Oaklawn Park

Weather: Cloudy. Track: Fast.

FIRST—$5,500, cl, 4YO up, 6f. Triac (Bielby) 13.80 9.80 5.60. Stalking David (Smith) 6.00 3.80. Sneakinprince (Simington) 3.80. Time—1:10 4/5. Scratched-Nile King, Date To Dance, Rode Hard, Flashy N Fast.

THE ULTIMATE CONTENDERSCAN

PIRCO'S Ed Hopper has taken the CONTENDERSCAN algorithms devised by "The Hat" and myself and produced the quintesential CONTENDERSCAN.

If you fail to find the winner 70% of the time with this program you need to increase your analytic skills. Each contender's performance against the best possible fractions the race could produce are clearly evaluated in these readouts.

THE TRUE VALUE OF CONTENDERSCAN

Most clients using CONTENDERSCAN look merely at the CONTENTION FACTOR rankings and rush to enter the top four or five. This is the bottom line but the true power of the program lies in evaluating the contenders against the dream race.

RACE # 1

CONTENTION FACTOR	
DDD	57.373
BBB	57.306
AAA	56.826
CCC	56.798

THE DREAM RACE

	1F	2F	3F	2ND CALL
* PACE	57.22	53.12	53.55	55.16
DDD	56.59	53.12	51.06	55.16
BBB	57.19	51.47	53.55	55.00
AAA	56.87	51.47	52.08	54.85
CCC	57.22	51.16	52.27	55.00

A COMPOSITE OF THE BEST POSSIBLE VELOCITIES BY CALL OF ALL THE CONTENDERS BASED ON THEIR PAST PERFORMANCE

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

In this ROUTE race we see that the best 1st fraction is 57.22. Who ran it? CCC. The best second fraction-TURN TIME-was 53.12, run by DDD. The highest second call velocity is 55.16, DDD is in the lead at this point. Top 3rd fraction:BBB. The slowest 3rd frction: DDD. We can immediately see how the race shapes up. The precise match-up looms before us.

CCC takes a slight first call lead just ahead of BBB, followed by AAA.

DDD lags. Now, around the turn DDD makes a move on the field that puts it in the lead at the Second Call.

CCC, having relinquished its lead to DDD makes a fairly good move in the final fraction. AAA begins to lag. DDD runs a slow 3rd fraction as BBB comes on again.

This is how the race shapes up on the basis of velocity alone without regard for any energy bias. So, before we bet, we must consult our Track Profile for the Early Energy percentage for winners at this distance under today's conditions and weigh our wagering decision thusly.

PHASE III

	EP	SP	FW	%E
DDD	55.16	53.11	54.13	51.93
BBB	55.00	54.27	54.64	50.67
AAA	54.85	53.47	54.16	51.29
CCC	55.00	53.64	54.32	51.27

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

Prior to the advent of ENERGY and its implications in the Brohamer Model, we would have catagorically made win bets on BBB and CCC. In doing so we would have been correct about 63% of the time. We can now up that proficiency considerably by basing our wagers on the track WIN ENERGY profile. If our percent Early profile par is 52% or above at this distance we tend to ignore DDD's slower 3rd fraction and bet it on top. BBB may be a prine place investment based on its contra energy. What about AAA and CCC who are virtually tied? My nod would go to CCC based on a better second call. At an Early Pace track DDD's TURN TIME move, despite its slow third fraction would make it a prime wager. On a Sustained Pace Track BBB would be a standout.

Nothing says you must confine yourself to a single pace line in using CONTENDERSCAN. Experiment with it. Let it help you to profile various horses to see how they USUALLY handle the pace of their races. A few hours with this program will tend to implant insights that will help you to automatically perceive matchups in the future.

JAMES QUINN

TABLE 5

Race Scenarios for Each of Five Points on the Competitive Quality Rating Scale

POINT 1. NONCOMPETITIVE

1. A wire-to-wire romp by a lone frontrunner.
2. Without any exertion of its own, merely by running evenly or slowly, an off-pace horse or late-comer catches a tiring leader in deep stretch, passing without resistance to win late.

POINT 2. MILDLY COMPETITIVE

3. The frontrummer draws away from a contested pace after only a quarter mile or sooner, relaxes, and wins unmolested thereafter.
4. An off-pace horse or late-comer catches the leader near the pre-stretch or stretch call, and following a brief challenge and several strides, one horse draws off to win.
5. The pack or several horses run easily and evenly to the far turn or quarter pole before one horse draws out to win without late pressure.

POINT 3. COMPETITIVE

6. Any race having both an early challenge and a late challenge, the late challenge lasting approximately one-sixteenth of a mile.
7. A flight of frontrunners continues to challenge one another into the stretch and by the eighth pole the eventual winner draws clear and survives.
8. A late-comer, off-pace type, or several, chase a tiring frontrunner through the lane, catching up near the sixteenth pole, and winning before the wire.
9. Two or more late-comers challenge the front-running horse or pace-pressing horses in the upper stretch, and in another sixteenth or so the best horse pulls away and wins.
10. Two or more off-pace horses and late-comers arrive at the leaders as they are collapsing and continue to battle one another for a sixteenth or so, until one of them manages to wrestle clear and win.

POINT 4. STRONGLY COMPETITIVE

11. Repeated serious challenges early and late, involving the same or various horses, the late challenge persisting for one-eighth or three-sixteenths mile.
12. A strenuous prolonged challenge throughout the stretch, beginning in the upper stretch or at the three-sixteenths pole.
13. Frontrunners are pressured strongly early and lasting for approximately three-eighths, draw clear between second and third calls, and soon are challenged again in the late stages, the last challenge lasting about one-eighth mile.
14. Off-pace horses chase a quick pace while retaining striking position, move up to challenge at the pre-stretch or stretch call, and persevere for one-eighth mile or longer.
15. Late-comers move into a contested rapid pace approaching the pre-stretch or stretch call, then run determinedly against other horses for an eighth mile or farther, before winning.

POINT 5. UNUSUALLY COMPETITIVE

16. A continuous challenge or repeated series of challenges demanding the ultimate combinations of speed, endurance and determination extended for a quarter-mile or farther. The winner has been all-out and so have several losers.
17. Frontrunners sustain a fast-fast pace under relentless pressure, winning after a bruising final quarter-mile or repeated challenge. Often all physical energies have been exhausted, the horses competing in the end on courage.
18. After gaining ground against a rapid pace, off-pace horses or late-comers take up the final challenge about one-quarter mile out and persevere at full throttle under pressure until the end, winning closely.

LONG THE MASTER OF QUALITATIVE CLASS HANDICAPING, QUINN HITS THE ROAD WITH HIS FIRST QUANTITATIVE APPROACH BASED ON THE DEGREE OF COMPETIVENESS OF A RACE AS PERCEIVED THROUGH TRIP.

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

We agree wholeheartedly with Quinn's class as Pace/speed/ competition factors but demur over his insistance that the race must actually be viewed in person or via videotape. I am firmly convinced that by using the PACE OF RACE/HORSE program, especialy the one with the extrapolated stretch call, that we can handicap the winner's trip against pars and competition by examining the Results Charts of a race. If we can demonstrate this to James Quinn it will enhance public acceptance and use of his quantitative approcah to class. We differ with both Quinn and Dr. Qurin in their use of the same PACE pars, by class level for all sprint distances and route PACE pars, by level, for all route distances. We know empirically that the second call WIN PARS at 6furlongs are not the same as at 6.5 and 7 furlongs. Neither are second call times the same for winners at a mile, Mile and one/sixteenth and a mile and one eighth. Perhaps it is their use of race shapes and heavy emphasis on final time that keeps this discrepency from negatively affecting their handicapping results.

LET'S Do A RACE USING QUINN'S 6 Furlong Pars for 10,000 Claimers and see if we can determine the competitiveness Factor.

Bold Comrade ran the second cal (pace) exactly in par, .48 f/p/s faster than Pickwick. He then negotiated the 3rd fraction .78 below par but was not contested.

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

In handicapping the 12 horse field of this 1st race we eliminated only the hopelessly outclassed and outrated horses, leaving 7. While INTRIGADOR was not a win threat, we handicap it because it may effect the early stage of the race. We used only 6 final beaten lengths since it pulled up after being behind by 15 at the stretch. We were most generous with our use of pace lines for MURALTO and ECONOMIC GROWTH in order to envision the best possible matchup. We used the Stretch conversion program to extrapolate the 6 furlong portion of BOLD CONCORDE'S 7 furlong race.
BUT, we also figured this gelding at 7 furlongs to get an ACCURATE picture of its early energy percent expenditure in its last race. BOLD'S extrapolated 6 furlong time was 1:10:3...Beaten 1/2 length.
Its SEVEN furlong Early Enerhy % was 53.48%, just .21% less than it expended in its six furlong winning effort today.

In the final analysis the TOP 2 FACTOR W Horses Won and Placed with the win mutuel $13.60. The Place horse paid $7.40. A rather effortless way to make a profit. No adjustments were used and the race provided an excellent opportunity to properly use the stretch conversion program for Bold Concorde. The most important ENERGY consideration here is that the only two contenders who fit the Early Energy % model won and placed.

In evaluating the Sartin Methodology, author James Quinn has said that it is more sensitive to even the most subtle aspects of bias than any other procedure; and that it is unique in its ability to measure miniscule energy demands imposed by any given track under any given circumstance. We have discovered over the past two years that these seemingly hidden aspects of track bias relative to energy can often supercede conventional readouts by projecting winners that might otherwise be virtually eliminated from consideration. The problem lay in creating ratings that would be equally predictive of short priced AND long priced horses. Both SYNERGISM and ENERGY are constructed to meet this demand.

by

Bob Purdy

The last several years of my association with Dr. Sartin have enabled me to meet other users of the Phase III methodology, users who like myself, have had considerable difficulty with adjustments. I am referring to DAILY TRACK VARIANTS, SPRINT TO ROUTE ADJUSTMENTS and DISTANCE ADJUSTMENTS within sprint or route races themselves. For me, (and I assume for others) adjustments for the Phase III Methodology have remained the largest single obstacle to climbing the win percentage ladder. About three years ago, I made the decision to tackle this problem. SYNERGISM is the product of continuous (off and on) research and development of an advanced Phase III program that eliminates ALL ADJUSTMENTS on the part of the user except for class, and then only when warranted.

This program is so automatic, you can put the tape into the cassette player of your car and it will drive your car to the track while you study the form. (Just kidding about the car guys) It

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

will however, handle every conceivable handicapping situation you will encounter using the Sartin Methodology, within the framework of the types of races readily handicapped with the method.

The task for SYNERGISM was to duplicate the task of generating Daily Track Variants without the expenditure of all that time and energy, while keeping the selection process as profitable as if the time and effort of calculating daily track variants had been expended. I am happy to report that SYNERGISM does that very effectively. AND, early testing has shown a higher average mutuel.

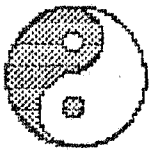

In most of the races I have done, SYNERGISM duplicates the ranking's of Early Pace, Sustained Pace, Factor W and Weighted Turn Time (a new factor for most of you Phase III devotees) giving you the same selections you would get had you gone to the time and trouble of producing very accurate daily track variants.

This program, along with a complete manual, will be available in the very near future for many of the computers we already support.

Happy mutuels,

Bob Beals

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

SYNERGISM

COOPERATIVE ACTION OF DISCRETE AGENCIES SO THAT THE TOTAL EFFECT IS GREATER THAN THE SUM OF EFFECTS TAKEN INDEPENDENTLY PRODUCING A RESULT WHOSE MAGNITUDE EXCEEDS THE SUM OF ITS PARTS.

In the begining when we combined the feet per second total of the first and second fraction to produce EARLY PACE; and the Second Call and third fraction to give us SUSTAINED PACE, we grew from a pure velocity method to a SYNERGETIC method. With the addition of FACTORS X and W SYNERGISM became our dominant theme.

In the language of Theology, Synergism is the action of divine grace or cosmic infusion with human action producing a result that exceeds normal human expectation.

In developing the SYNERGISM Manual and computer program, Bob Purdy, in concert with PIRCO, has raised SYNERGISM to its highest potential with results that are beyond any normal expectation. It is the ultimate consumation of Phase III.

ON THE LEAD VS. EARLY ENERGY

EARLY PACE RATINGS & PERCENT OF EARLY ENERGY, NOT POSITON CALLS DETERMINE EARLY ENERGY PARS

The telephone call came at about 8 pm the night of January 21st. The caller was a despondent client who was about to go back to speed ratings or ouiji boards because, he said, after establishing firm Early Energy percentage pars at Santa Anita everything went all to hell on this day. His Early % par for sprints was 52.80% and today all the winners came from "WAY OFF" the pace. How did he know? He watched the first race and the winner was 5th at the second call. In the second race the winner was again 5th and in the third race he was sixth in a six horse field. The track was running sustained. In the 4th race the winner was again 6th at the second call. Not until the 5th race did a "Speed horse" finish first. I asked how many lengths were the winners behind at the second call? "Way behind," the client moaned.

The next morning I bought a paper and checked the results charts.

In the first race the winner was 5th alright-1.6 lengths behind the leader. Its Early Energy percentage was 52.90%: .10 OVER Par.

The winner of the 2nd race, though 5th at the 2nd call, ran 53.11% early. The two winners who were 6th at the 2nd call had Early Energy percentages of 52.38 at 7 furlongs, about par for this more sustained distance; and 53.28 at 6 furlongs.

The clients problem was in perceiving 6th position as being catagorically sustained. He had gone back to the dark ages of handicapping wherein the "Speed" was always on or next to the

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

lead, and horses not on the lead were "Closers." Before the DRF published the Pace TIMES at each call this approach standard and hard to avoid. Since 1975 the FORM has given us pace times so that by entering them along with beaten lengths we can ACCURATELY determine rate of velocity and Energy percentages. Don't be deluded by position calls. Horses on the lead may well be running Sustained, just as horses slightly off the lead may be exerting perfect win energy EARLY percentages.

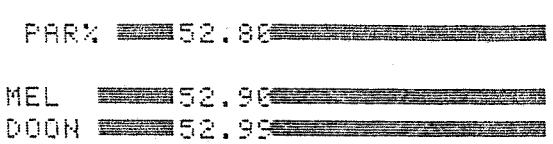

Interesting to note that in the 5th race, the First one where the Early "Speed" held up, the winner's Early Energy percent was only 52.99%, .29 less than the 6 furllong winner who was 6th at the 2nd call.

Ironically enough, this day was an almost picture perfect example of Early Energy % pars holding true.

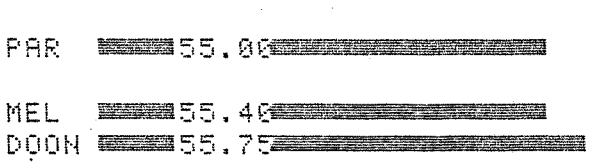

Over the past couple of years I have had countless phone calls and many letters from clients claiming zig-zag energy patterns at their track only to discover when checking the charts that the irregularities were of subjective origin and not garnered from actually charting the races.

ONE MAN'S OPINION OF THE NORTHERN NEVADA RACEBOOKS - - FROM A WOMAN'S POINT OF VIEW

or

EVERYTHING YOU ALWAYS WANTED TO KNOW ABOUT A NORTHERN NEVADA RACEBOOK BUT WERE AFRAID TO ASK

by

Jerri Kay Lincoln

Playing off track in a northern Nevada racebook does not have to be an intimidating experience. With a few pointers on how to use their facilities, you can act like the professional you truly are.

Northern Nevada, depending on where you are, has several racebooks to choose from.

Reno has five racebooks at the present time. The Hilton is supposed to be building one, but they don't know how soon.

The Reno Turf Club is a racebook/sportsbook only - - it is not incorporated into a casino. It is large and roomy, and has it's sportsbook separate. Besides the seven television monitors, it has narrow tables, and the chairs are attached to the floor. The tables are too narrow for my liking, as it is difficult to keep all my models, racing forms, and other paraphernalia in the small space in front of me. The attached chairs were definitely not made for short people, as the only choices are leaning uncomfortably forward, or sitting

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

on your feet, or both. They do have a small snack bar inside.

Cal Neva has a large racebook separate from their sportsbook. They have six television monitors, and a large monitor at the two front corners. They have large tilted desks with attached chairs. They also have a "racebook lounge." It has three television monitors, and one large monitor. It is a comfortable lounge-type atmosphere, but there is limited race information. There is one betting window, but I have yet to see it open. There is a restaurant in the general area.

Harrahs, when I last visited, was in the process of building a new racebook. It should be open now. There will be about fourteen television and larger monitors. The desks are a little on the small side, and they have attached chairs. The new 'book is larger than the old one, but does not seem to be a vast improvement.

Bally's Reno (the old MGM), has a really nice roomy and quiet racebook. They have two television monitors and three very large screens. They have large tables with unattached chairs. They have a snack bar in the back. Their sportsbook is completely separate from their racebook. This is significant whenever there are sporting events, but especially during playoff games. There is nothing worse than having some drunk pounding on the tables, screaming in your ear, and

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

spilling beer in your lap, as you're trying to concentrate on the early or sustained pace horse.

Bally's and John Ascuaga's Nugget are by far the nicest racebooks in Reno. The Nugget is actually just outside of Reno, in the town of Sparks, but is only about a five minute car ride from Bally's. It has a large comfortable racebook, that makes you feel like you're sitting in your own living room. There are large slightly tilted desks, complete with a storage compartment (for models, etc.), and private reading lights. There are eight television monitors, and four large monitors. It is a quiet place quite removed from the hectic casino environment. They also have a snack bar.

If you are on your way from Reno to Lake Tahoe, your trip will not be complete without a stop in Carson City at Artichoke Joes. It's a large place that also has a mini card parlor. They have seven television monitors. There are double desks with wooden desk type chairs. If you're looking for a place totally away from the casino element, this place is for you.

Now, over the hill to Lake Tahoe. High Sierra's racebook is a little on the small side. There are four television monitors, and one large screen. There are narrow tables with attached chairs.

Harrah's Tahoe racebook has four television monitors

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

and one large monitor. They have narrow tables and attached chairs. There is a restaurant close by. They are in the process of building a new racebook, but if it is the same design as the one in Reno, it won't be a marked improvement.

Caesars Tahoe racebook is the newest in Lake Tahoe and has no competition. It is far superior to any other racebook in all of northern Nevada. It has nine huge screens, of which six are usually devoted to horseracing. (The other three are sports.) There are large desks with individual reading lights, and comfortable chairs that are not attached. There is a snack bar directly adjacent to the 'book.

The first thing to do when you walk into the racebook, after getting your forms, is to get "scratch sheets" for the tracks you are planning to play. As the name suggests, this sheet gives you the scratches of the day, as well as the all important horse betting numbers.

These horse numbers are an important difference between on track and off track betting. At the racebook, there is no such thing as betting horse number four in the second race. Each horse, from each track, has his or her own number, i.e. 781 or 1247. You need to know two numbers for each horse, because the tote board uses the 1,2,3 track program numbers, but you

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

must bet with the horse betting numbers found on the scratch sheets.

Generally, and I mean generally, because often it is not so, the last digit, such as the one in 781 or the seven in 1247, is the horse number from the track. This changes when there is an entry. The entry will always be horse number one on the tote board at the track, although the two horses that comprise that entry, could have betting numbers of 642 and 647 at the racebook. When there is an entry in a race, it will throw off the number scheme of all the other horses. So horse number two on the tote board could be 641, and horse number three could be 642, and so on. Also, when there are more than nine horses in a race, numbers ten, eleven and twelve are often switched around.

All of these changes, however, are usually indicated on the scratch sheet - - it's not like they leave you to fend for yourself. With all the numbers being dealt with, there is the very rare mistake, but they really are exceedingly careful not to let that happen. If you do happen to notice a horse that was thirty to one on the morning line, and all of a sudden he is the two to one favorite, it is safer to ask someone in charge, just to be sure.

Please beware of these scratch sheet horse betting

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

numbers, as they could mean the difference between winning and losing a race. The second worst thing that's happened to me in a racebook, is watching my horse of long odds bound across the finish line several lengths ahead of it's nearest rival; then checking the ticket to see how much I had bet on him, only to find to my horror, that I had bet the wrong number. Right horse, wrong number. The worst thing that's happened to me in a racebook, is the same scenerio, but not realizing I had the wrong number until I tried to cash the ticket - - talk about embarassing - - whew! - - not to mention I lost the race! I thought I was careful with the numbers after the first time it happened, but after the second time, I could practically guarantee the correct numbers with my life. So please, be careful of this. There is nothing so disappointing as winning a race and losing the money.

Somewhere at the front of the racebook, there is a list of the horses, with their track numbers and their corresponding scratch sheet betting numbers. (This is also where the condition of the track can be found. They are not always efficient about changing the track condition if it changes in the middle of the day. So, if the weather has changed, and you have some doubt, watch as the camera pans the tote board, and you can verify the track condition there.) At Caesars,

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

the list of horses is on one of the screens, one race from each track at a time. At the other racebooks, the list is on a "raceboard" - - a two foot by four foot piece of paper, that after the race, also has the winners and corresponding payoffs on it. At Caesars, the winners and payoffs are indicated on a scratch sheet that is located at the back of the racebook, close to the controlling computer. At most of the racebooks, in some corner or other, they also have a list of yesterdays winners, in case you left before the race went off. The screen at Caesars, and the raceboards at the other racebooks, also advise you of any late scratches. The raceboards indicate a scratch by drawing a line through the scratched horse. The screen at Caesars will have the scratched horse completely off the list, as well as his name and betting number below on a scrolling message that tells of all late scratches. This scrolling message also tells of first time Laxix users for the California tracks.

During the week, you can usually wait until the last minute to go to the window to place your bets, as there are little or no lines. During the weekend, it's safer to get in line a few minutes earlier, to insure that you don't get shut out. You can watch the odds as you stand in line, however. The law in Nevada permits the racebooks to take bets only until the first

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

horse is loaded in the gate, (although sometimes they cheat). So when you see the horses come out on the track, gauge your time accordingly. Although the televised tote board does have the minutes to post on it, there is no two minute warning signal at the racebook, so, as Dr. Sartin says, "the onus is on you," to get your bets in on time. Also, if there is a track that is not televised, bets are only taken until two minutes prior to the expected post time.

Another word of caution concerning racebooks that have more than one screen or television showing the races - - DON'T WATCH THE WRONG RACE! This is easier to do than it sounds, because often two or more races go off at the same time. It's especially easy to do if you're playing primarily one track, and then switch to another. You're used to watching one screen, and in the excitement of the moment, you forget to switch your attention to the other screen.

On one particularly glum day, I had had a tiff with my boyfriend, and went down to the racebook to forget my troubles and play a couple races. I made my bets and proceeded to watch what had to be the worst race of my entire career. Neither one of my horses ever got a call! In the mood I was in, I just thought to myself, "It figures," and left dejectedly. On my way out, I overheard someone discussing the

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

trainer of the winning horse, but I didn't think anything of it at the time. However, at approximately two A.M. that night, after having kissed and made up with my boyfriend earlier, I actually woke up from a sound sleep, and thought, "That trainer doesn't train at that track!" I jumped out of bed and literally ran to check my racing form. (I know Dr. Sartin encourages personal regression, but I doubt if he endorses it in the wee hours of the morning. But this was one regression that couldn't wait!) As expected, the horse I thought had won, had an entirely different trainer. And when I double checked the race at the other track that had run concurrently, the winning horse did indeed have the trainer that I had heard being discussed. When I arrived at the racebook the following morning, I discovered that my horses had come in first and second! I think that was a more exciting finish than many stretch duels I had seen!

So, learn by my mistakes - - don't watch the wrong race. This isn't really as flagrant an error as betting on the wrong horse number - - that is, unless you throw your ticket away before you realize you watched the wrong race! But it is one thing to be careful of.

As far as cashing tickets go, that feels just as good at a racebook, as it does at the track.

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

The racebooks usually have one cashier open, while they have three or four betting windows open. The cashier is also usually shared with the sportsbook. However, a long line is unusual except during peak periods, like playoff games, or sometimes holidays, or whenever there is a large cluster of Sartin advocates in the area. Most of the larger racebooks also have a mail-in policy, in case you need to leave before cashing your tickets. Information on this policy is usually printed on the back of the ticket.

For me, there is no comparison between a racebook and a racetrack. Perhaps a racebook just suits my personality better. I admit that my memories of the track, are of long lines, long walks through smoggy and crowded parking lots, and being pushed and shoved all over the place. And sitting in a more exclusive area just meant being pushed and shoved by people in more expensive clothes.

To me, a racebook is absolute paradise. I think racebooks were invented just for the Sartin Methodology with the Brohamer Model. If not, they should have been, because the Methodology and the Model are perfectly suited for racebook use: the quickness of Ultra Scan to get several races done before the same post time; and the Brohamer Model to know exactly how each distance at each track is running.

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

The variety of tracks and races at the racebook, affords you the luxury of passing less desirable races, and still have plenty left to choose from. Don't make the mistake of going to a racebook, and only playing your home track. Be brave! Experiment! Live a little! Watch the races at the other tracks to see how they're running. Handicap a couple races, and if you're still hesitant, don't bet them, but start a model. Then go for it! I think you'll find if you're a winner at home, you'll be a winner at the racebook, too.

One of the major advantages of the racebook is watching the race. You may think this is a disadvantage, but you really get a great view, and in some of the newer racebooks, the horses are practically lifesize. You even get the post parade! Nobody is jumping up in front of you, (except the occasional drunk, and even so, you can still see), and no matter where the horses are on the track, you still have a perfect view. There are even replays, so you can revel a second time as your horse beats the field by five lengths; or, suffer a second time as your horse gets beaten by a nose! But you get a great view of it, nonetheless!

Meeting new and interesting people at a racebook is also an advantage. Even Methodology users should

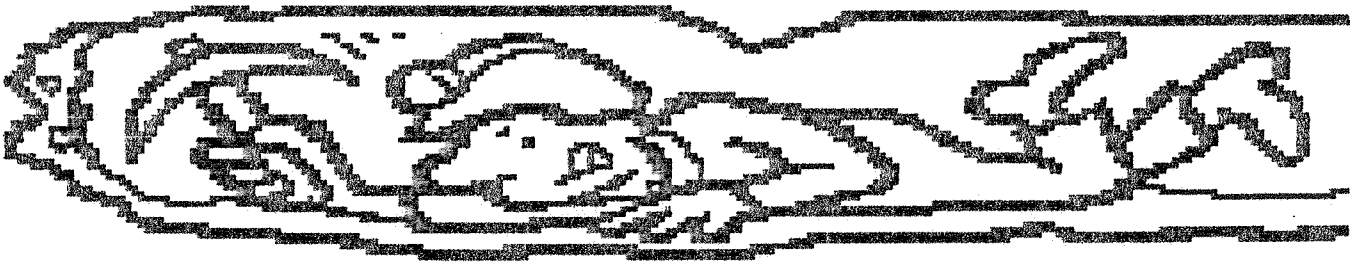

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

be open to new ideas. One day I was sitting next to a lady, who I didn't pay too much attention to, until my horse lost and hers won at huge odds. I moved closer to discover the secret that was somehow missing from the Sartin Methodology. (Although, maybe it will be included in the new "Everything Scan" program.) She whispered her secret to me: today, she was playing gray horses.

#

THE "LETS WORK SOME RACES TOGETHER" PART OF THE MANUAL.

By far and away the most requested feature from people I talked to about this seminar was for us to handicap some races together. So here are three races that we'll work through together. Of course, the results charts and the lines I used are in the back of this book. You can peek if you want, but you won't get as much out of the exercise as you will if you just handicap the races. If you do the races the night before, don't look back and check out who won. Bring your work to the seminar just like you'd bring it to the track. I have plans for you.

In the money box of each horse (except a couple of foreign horses) you'll see two numbers. The top number is Average Purse Value, or APV. The second (the number in a circle) is an experimental class rating I'm testing. I'll talk about it later. For now, feel free to ignore it.

To give you all an even start, especially those of you who don't regularly play Santa Anita, here is what my records showed going into this Saturday. I'm sorry they're not more complete, but I had been working very hard on The Follow Up and this was all I had. Just like in the real world.

6 Furlongs

Track Profile - Last 11 winners were within 2 lengths of the leader at the 2nd call.
The last two weeks the winners averaged 52.70% Early.

Brohamer Model - Top 2 Early Pace with strong (top 3) Factor W.

6.5 Furlongs Turf course. Downhill

Track Profile - Winners averaged 52.50 to 53.00% Early.

1 Mile

Track Profile - Routes were running Sustained. However, the race I'm using as an example is a Grade II Stakes race, so the track profile doesn't really apply. These horses run right through track biases. You're going to have to match up the race as a unique event. Just remember that the track was favoring Sustained horses.

The races on Saturday, Feb. 21 at Santa Anita didn't look hard or complex when I handicapped them, but the prices paid for picking the winners were very generous. The third race was the start of an exceptional day. I'll go through the horses one by one, then I'll try to describe my decision making process.

Before we start, a word about the two numbers you see in the money box. The top number (63 for the first horse) is the APV. I don't bother to write the decimal point or percent sign, but this horse has an average purse value of 63% of todays purse. The other number, the one I circled, is a class rating I'm experimenting with. It is based on the old Phase III class rating, but uses APV's of under 100 and has no maximum value. More about this later, but for now I'll tell you that I find that 90-95% of all winners are in the top 5 and that I can safely eliminate any horse with a rating of less than 120.

BLOCK KNOCKER - Not much to recommend it. Won very short, then got killed at today's distance. Last shows it might be able to route, so why put it back in a sprint? Don't be fooled by the horse being in first place last time at the 6 furlong call. It did that in 1:12 flat. At Santa Anita, the tractors go faster than that. This horse should not be in this race. Must be a new trainer.

BALTIC SHORE - An English horse with an average record. Really got pounded last out, but many shippers need a race. Was in a tremendously fast race last time and didn't break well. On the other hand, it never gained a step during the entire race. Showed absolutely nothing. Today should be run about 1:10 or so. You have to ask yourself is this horse likely to improve 12 lengths? Class figures and APV is meaningless with foreign horses. I did not use the horse.

CONTACT GAME - Coming out of the same very fast race. The horse wasn't disgraced, but may have been chasing speed. I chose not to use it because it doesn't meet my class requirements. I only used 4 horses in this race; if I had added a fifth, this would have been the one.

MOMENTUS - Difficult choice. This horse should easily outclass this field, but it fell in its last and has been out for 5 months. Bonnie Ledbetter warns against betting on horses who fell last time, as they many times have psychological problems. I went ahead and used its 6 furlong race. We'll talk about this horse more latter.

WESTERLY WIND - Definite contender. Has tried this level three times and run well each time. I chose to not use its time off a "good" track and went back one race to 27 Dec. About the only negative on the horse is that it has been off 6 weeks and hasn't worked regularly.

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

BLANCO - A contender. Many people stay away from maiden winners until they prove themselves against winners, but this is a Non-Winner of One race and who is better suited than a horse that just won a maiden race first time out of the barn.

SIMPLY MAJESTIC - A contender, but its tough to find a correct pace line. The horse has shown that it isn't a router and was in way over its head last out. Going back to the 7 furlong race seems logical, but a 1:26.1 7 furlong time is nonsense at Santa Anita. This line would require about a +3.00 adjustment and a track class adjustment, so I chose to go back one more to the 10 Nov. race at Aqueduct. I used the internal fractions from the one mile race. If you ask why I used a race from a "good" track when I could go back one more and get a better race for the horse, I used this race because I felt it was more representative of what the horse could do. Going back one more is using the horse's lifetime best race where it got loose on the lead. This will not happen today, when BLANCO has proved he can run a 44.3 half. The figures I entered were 22 45.2 1:10.2 0 0 .75.

ADAM BOMB - Close, but doesn't quite have the class or the speed. Santa Anita needs Early pace and this horse just doesn't have it.

If you'll turn to the printout of this race, I'll tell you that I bet 60% of my win bet on WESTERLY WIND and 40 % on SIMPLY MAJESTIC. I also used these two with BLANCO in an exacta box. Here's why: My model tells me that Early pace is winning, if the horse also has a good Factor W rating. Looking at my track profile, I see that 6 furlong races were being won with about 52.70% Early Energy and that the last 11 winners were within 2 lengths of the leader at the 2nd call. Now the horses:

WESTERLY WIND - Perfect fit. Energy is right (.35 too early isn't bad. Several horses won with Early Energy this high recently), number 2 Early Pace horse with the top Factor W. Best of all, its paying 7-1. A strong bet.

BLANCO - At first glance, this is also a good fit. The problem lies with that 53.42% Early Energy. There are times at Santa Anita when that is fine, but recently, it's just too early. I left him out of win betting, but used him to place.

SIMPLY MAJESTIC - Figures to be within 2 lengths at the second call and has acceptable Early Energy. Again, my records show several horses with wins near this figure. I used him to win and place in the exacta.

MOMENTUS - Even if you like to bet on horses that fall down, this horse's Early Energy say its not going to make it. He has a decisive advantage in Sustained Pace, but a real question mark is if he is ready to run. He just doesn't fit this track. I chose to eliminate him altogether.

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

I had two surprises in this race. First, WESTERLY WIND again faded. He was definitely my top pick and I thought he would win. If you had held a gun to my head and made me pick just one horse, he would have gotten the nod. The horse is just too early for this track at this time and in this company. BLANCO did exactly as I thought he would; went out fast and faded to second. The other big surprise for me in this race was the price that SIMPLY MAJESTIC paid: $55.60 is the overlay of the century. The $2 exacta price of $186.00 was welcome as well.

6399 THIRD RACE 6 Furlongs Purse: $27,000. Allowance. Three year olds. Value to Win 14,850 2nd 5,400 3rd 4,050 4th 2,025 5th 675

Note: Race was handtimed.
SCRATCHED: NONE

SIMPLY MAJESTIC, within close distance of the early lead while wide, raced in hand when biding his time around the far turn while saving ground, angled out in the upper stretch, accelerated when set down to take the lead nearing the sixteenth marker and drew clear. BLANCO vied for the early lead, could not stay with the winner in the final sixteenth but kept to his task enough to prove clearly best of the others. CONTACT GAME, within close range of the early lead, lugged in and was steadied leaving the furlong marker and weakened thereafter while continuing to lug in.

$2 Exacta 7-Simply Majestic & 6-Blanco Paid $186.00

The fifth race from that same Saturday was so easy I was almost embarrassed to cash the ticket. The only real problem in the race is that 4 of the horses are coming from a tandem race. I again used my experimental class rankings to find my top five horses. After that it was a snap.

FEMME ELITE - Well, maybe not a snap. This horse is a tough choice. A grade I winner in France, it has shown nothing in this country. It ran respectably down the hill on this same course at this level in its first American start, than got creamed up north. The horse looks like it has health problems and I chose to eliminate it knowing I'm taking a risk.

MISSIAN - The first horse coming from the tandem. I have a lot of trouble eliminating this horse, but I am experimenting with this class rating and so far it's working a treat. The horse is not in the top five and is under 120. Out.

LUCKY SILVER - Also from the tandem. A solid contender. Use the last race.

REALLY FANCY - Yet another tandem horse. For the past four or five months I have been using a revised technique with tandem horses that Jim Bradshaw and Dr. Sartin developed; using the tandem race but giving the other horses in the tandem the same beaten lengths at the final call as the winner or best finisher from the tandem. We'll be writing more about this is future issues of The Follow Up. In this case, both horses had the same final beaten lengths, so no change was necessary.

VIVID DANCER - This horse just doesn't belong in this race. Easy out.

ANDRUSHKA - A layoff horse, but its been working regularly, so I'll use its second back. Tom Brohamer taught me never to use the race that put a horse in the barn for a long stay. It had to have hurt itself in that race, so we'll go back one.

SIR'S NEW HOPE - Right on the borderline. My number 6 class horse, its also coming from the same tandem mentioned earlier. One thing that counts against it is that you can see 10 failures at this level in its past performances. Out.

HAIRLESS HEIRESS - You've got to love the name. Just won a NW1, so it's an obvious contender. Use the last.

OFRENDADA - A contender without a pace line. A look at the horse's second call beaten lengths should convince you that it at least deserves a look. I see no reason to go back past its last race. I used the internal fractions and entered: 22 45.2 110.2 2 2 .125.

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

Finding the winner is so easy that all of you should see it leaping off the page and begging to be bet. HAIRLESS HEIRESS is the only horse in the race with anything like the correct Early Energy to win this race. The 6.5 furlong (6.41 actually) downhill turf course at Santa Anita demands good early speed. A clocking of 43.2 for the half is not unusual. HAIRLESS has such an edge in Early Pace that she can dictate exactly how the race will be run. The only question is if she can hold off OFRENDADA, who has OK Early speed and is the number one Sustained.

I bet both HAIRLESS HEIRESS and OFRENDADA to win and boxed them in the exacta. I also put both on top of ANDRUSHKA. $22.00 to win is a gift. The $425.00 exacta is a gift from the Dummy God.

6401 FIFTH RACE About 6.5 Furlongs on Turf Purse: $31,000. Allowance. Fillies and Mares. Four years old and up. Value to Win 17,050 2nd 6,200 3rd 4,650 4th 2,325 5th 775

Note: Race was handtimed.

SCRATCHED: Coy, Public Sympathy

HAIRLESS HEIRESS, off alertly and a pace factor from the start, responded through the stretch to beat OFRENDADA in a stiff drive. OFRENDADA, also away alertly, pressed the early pace, threatened HAIRLESS HEIRESS through the drive but could not get by that rival. REALLY FANCY, never far back, finished well enough to gain the show.

$5 Exacta 8-Hairless Heiress & 9-Ofrendada Paid $425.00

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

The eighth race from that same day is included not for its handicapping difficulty, but to make a couple of points. The first is to show you just how well Bob Purdy's new program, SYNERGISM works. The second is the reason why we always bet two horses.

There were only five horses in this race, so I used them all. Don't pay much attention to APV or my class numbers in this type of race. These are all very lightly raced horses and no money box rating scheme works very well with these horses.

TIMELY ASSERTION - Literally the only problem pace line in the bunch. Today is a mile, so going back one is logical. This is a tandem race with DEVIL'S BRIDE, one of the pre-race favorites. What I did was to give TIMELY 0 beaten lengths at the final call. The rest of the race was left as is. TIMELY was beaten by 4 3/4 lengths in this race, the outside margin for eliminating a tandem horse. It did squeak in, and I didn't think DEVIL would get the easy wire-to-wire trip this time.

SENORA - A little short on class, but she's unbeaten, so what do you want? Use the last. Bob's program automatically takes care of sprint to route adjustments.

DEVIL'S BRIDE - Powerful contender. I didn't think it would be able to get the lead today, so I wasn't wild about her chances, but she will definitely play a part in the running of this race. Use the last, of course.

MY TURBULENT BEAU - The only horse that really doesn't belong in this race. Beaten in a NW1 last out, she has no real chance against a strong field like this. If you wonder what she's doing here, California pays down to fifth place.

VERY SUBTLE - Wow! Kentucky watch out. At least the Oaks. This horse has done it all. In 6 races it didn't get the call once, when it was second by a head. What we call overpowering. I'm not sure she'll be able to go much longer, but she proved she can win a grade I mile. I'll go back to her mile win without any qualms at all.

The race ran exactly as Bob's program predicted it would. DEVIL'S BRIDE took the early lead, gave up when VERY SUBTLE ran her down and TIMELY ASSERTION was charging at the end. Just like the script. Except . . .

Remember lesson two for this race? The one about betting two horses? Fifty yards from home, VERY SUBTLE put on the brakes. The Horsey Ones call this "proping." What it means is that the horse stuck out both front feet and tried to stop dead. The jockey said the next day she may have been frightened by some groundskeepers on the inner track. Who knows; horses are dumb enough to be scared by almost anything. Anyway, on to the moral of our story. By the time Pat Valenzuela got VERY SUBTLE moving again, TIMELY ASSERTION had blown by

Copyright 2009 O Henry House, SartinMethodology.com – Not for Resale

and managed to hang on for the win. This is why we bet two horses. Think of all the handicappers sitting in the stands who did it right, called this race right on the button (as did Synergism) and then watched their 3-5 pick decide to stop 3 giant steps from the finish. Also note that the winner, TIMELY ASSERTION, didn't come from outer space. She was the number 1 Sustained horse, number 3 Factor W. Early Energy just a taste low. Close enough than all she needed to pay $28.00 was a bobble by the leader.

I wouldn't blame you if you decided to pass this race because you thought that VERY SUBTLE was a lock, but the odds were too low. But if you did bet it and ignored the Doc's maxim about betting two horses, then you have only yourself to blame.

Note: Race was handtimed. Breeders' Cup Awards to: Timely Assertion and Very Subtle. $2,250 in foal and nominator awards. $2,500 reverts to Breeders' Cup Fund

SCRATCHED: Saros Brig

TIMELY ASSERTION lurked within close range of the early lead, kept to her task through the stretch while under a steady drive, finished willingly and got up in the final yards. VERY SUBTLE, off alertly and always prominent, moved up to engage for the lead outside DEVIL'S BRIDE approaching the half mile pole, battled for command until she finally put away DEVIL'S BRIDE to draw clear approaching the sixteenth marker, appeared to prop about seventy yards from the finish when seemingly bothered by something to lose her momentum and could not quite resist TIMELY ASSERTION'S closing bid. MY TURBULENT BEAU, outrun early but never far back, finished fairly well. DEVIL'S BRIDE gained the early lead, responded when hooked by TIMELY ASSERTION battle for command to near the sixteenth marker, then weakened a bit. SENORA, near the early lead, was under steadying restraint early in the run down the backstretch to drop back to last before going a half, appeared to have difficulty regaining interest, responded better in the drive to gain some ground but could not improve her position in the drive.

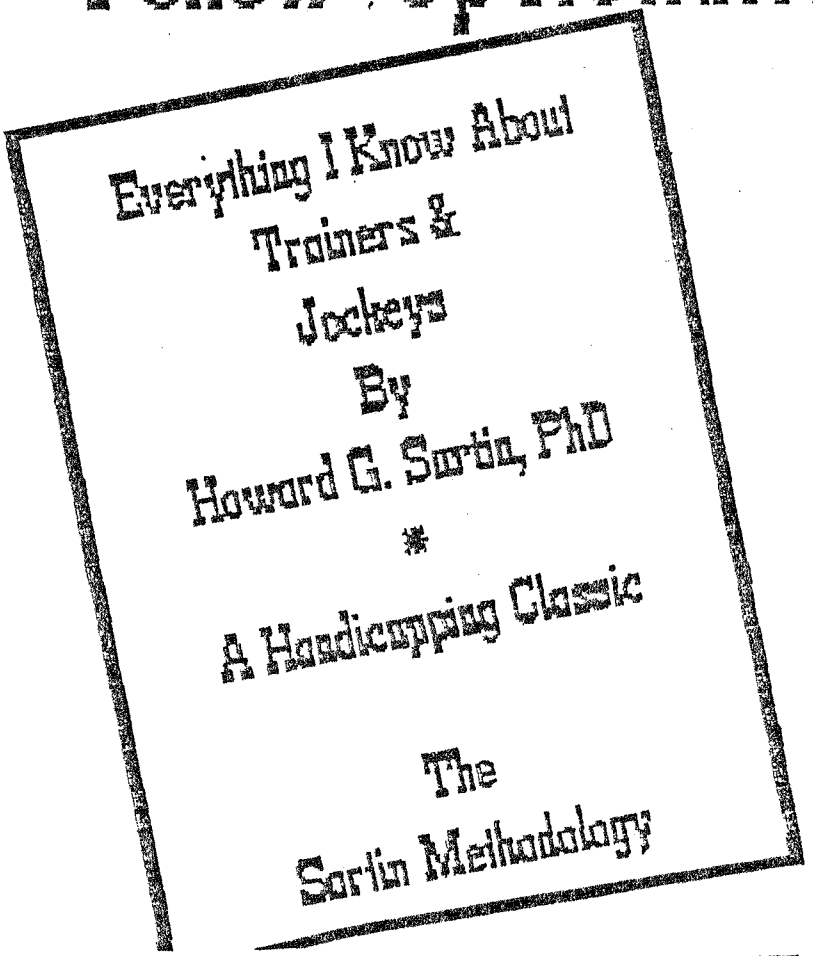

$5 Exacta 1-Timely Assertion & 5-Very Subtle Paid $145.00

$3 Daily Triple 9-7-1 Paid $12,218.70
