THE SARTIN
METHODOLOGY

1390 E. 6th Street #5

O. Beaumont, CA 92223

STATEMENT OF POLICY

The Sartin Methodology is based in Psychotherapy and its goals are NOT directed toward fostering the illusions or delusions of gamblers seeking magic solutions for picking winners. We are primarily a healing arts organization dedicated to providing an alternative solution to mainstream psychiatry's prescription of total abstinence for non-winning handicappers. Our slogan is - and always has been -

"THE CURE FOR LOSING IS WINNING"

A Note from the Office Staff ~

Just a brief page in the hope that we can expedite your requests and make you all happy clients

WHEN YOU CALL THE OFFICE:

The phone number is 909-845-5907. Our phone hours are weekdays from 1 to 3 P.M. Pacific Time. This is when we actually pick up and talk with you. If you have problems of a technical nature or you have a handicapping question, this is when you can call *and set up a phone appointment* with Shane, (or we will route you to a teaching member who can be of help) or to speak with Dr. Sartin (problems more of the "gee, I feel guilty when I win/lose" nature, or you want to get Thoromation). We will set up the appointment for a convenient time and day. A time which does NOT CONFLICT WITH OUR PHONE HOURS. If there is one thing we have learned, there is no such thing as "one quick question" and so we ask that you not request to ask that "one quick question" during our short open phone hours.

If you have not received an order: Has it been 2 weeks since we would have received it? We don't usually take that long, but sometimes it does. Give it two weeks before you call. If it has been 2 weeks or more, then please do call. Have the following information ready if possible:

***What you ordered • The date you sent your order • Check or money order date, number and \$ amt.**

Was the payment made out to: O. Henry House or Sartin Methodology

When you call and get the answering machine, leave a message stating as briefly as possible: YOUR NAME (spell it if necessary), REASON FOR CALL (ie did not receive Follow Up, order not yet received, etc.) Include the info above*. If we perceive a problem, we will contact you. If your order just went out, or the Follow Up is still at the printer, you will not hear from us, but rest assured, you have not been ignored. Please leave your phone number as we like to have everyone's phone number on file, but don't expect a call back. Remember that when you get the Follow Up bulk mail, it can take weeks to arrive! You can always upgrade to 1st class by sending in the additional \$15.00.

When we ship an order, it is always 1st class mail or UPS. The only exception is the Follow Up if you are paying bulk rate. **WE DO NOT SHIP OVERNIGHT!**

When you send in your order, please:

Do not imbed it in other correspondence.

If you would, on a separate sheet of paper, please note the following:

What you are ordering

If you are ordering a computer program, do you want a 5 1/4 disk or 3 1/2 disk

The price

Add 7.75% sales tax if you are in California

The date you are mailing your order

Your full name and address printed out

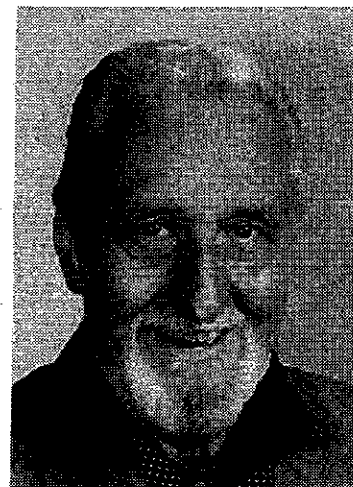

If you want to stop in to pick up an order, **CALL AND LET US KNOW WHAT YOU WILL BE ORDERING & THE DAY AND TIME OF YOUR ARRIVAL!** (We are usually unable to schedule office visits from 11:30 A.M. until after 3 P.M.) This is an extremely *busy* office and not really set up for visitors. By calling us first, we can have your order ready and somebody cleared to help you. Sometimes we are back-ordered on the item you want.

Office meetings with Dr. Sartin or Shane Sartin are *by appointment only*. We've had some very disappointed clients arrive only to find that there is no one available to answer their questions ("but I drove all the way from Phoenix!"). So, PLEASE, PLEASE, PLEASE call first.

Thank you to each and every one of you for your cooperation!

Gloria ~ Dea ~ Joyce

FROM THE
**Publisher's
Desk** **Doc Sartin**

First a word of heart-felt thanks to all of you who sent me scores of Thoromation reports each month. I congratulate you for your ability to utilize this program to reach profit levels that often exceed my own. I know many of you sending in these outstanding records would like to receive personal letters of congratulations. But this is the one area where the sheep that stay with the shepherd get second billing to those who go astray. Much of my time is spent trying to bring the less adept up to your standard. There are not too many of them but they require a lot of loving care. The rest of my time is spent writing the Follow Up, doing Win Therapy sessions and, in concert with Jim, and lately Guy Wadsworth, developing even more predictive programs and/or updates, like what Jimmy is now doing with Thoromation. Let this be my personal salute to all you "winners"!

To those who sometimes fail to get answers to their letters (I receive a mass of mail), I apologize. I try to answer almost every conceivable question you ask in the Follow Up Q & A and in other features.

Speaking of the Follow Up...

The office has sent notification to non-subscribers that unless they start subscribing, they will be removed from the client list (in other words they won't be clients anymore). We've had very little resistance to this new edict. A few, who never bet but use the Methodology as sort of an intellectual exercise, have balked. A few said that they could not afford to subscribe. One said that he didn't feel he should be "punished" by having to subscribe as he never asked for any help. Well, if anyone considers it punishment, they are free to go their own way.

I subscribe to many professional journals with whose content I disagree – such as the Journal of Gambling Studies, where they preach abstinence: Psychiatric Annals, where pharmacological therapy dominates. I do so to keep up with my profession. I also subscribe to handicapping newsletters that often bash me personally. It's a part of keeping up with the field in which we work and the times in which we live. The Follow Up is a journal dedicated to your success in the avocation and/or profession you have chosen to make your own. It costs \$72 a year for six issues of at least 72 pages each (and often more as in this issue). The vast majority of subscribers say they wouldn't be without it.

For those who would say they can't afford \$6.00 a month (that's what it breaks down to), consider this: The discount price for a pack of cigarettes is \$1.89. At 2 packs a week, this comes to \$16.25 a month. In major metropolitan areas, coffee is 85¢ to \$1.00 a cup. In Beaumont, it's at least 75¢ a cup. And, because of the freeze, or whatever, the cost of coffee is going UP. At today's rate, if you buy six cups a week, even at the rural area low end price, that's \$3.00 a week or \$12.90 a month. If you smoke AND drink coffee you're out at least \$30 a month. If you only do one, it's still a lot more expensive than the Follow Up. If you have a few drinks in a bar, you'll be sipping at least one Follow Up every other day. If you don't indulge in either cigarettes, coffee or liquor, congratulations. Now you have LOTS of no-sin money left over to invest in the Follow Up. So, any way you look at it, a follow Up subscription is MORE than a bargain.

NOTICE TO ALL DOWNLOADING FANS

NEW - NEW - NEW - NEW - NEW - NEW - NEW - NEW

XTOR

VER 2.0

COMING IN AUGUST!

All the old features are included, plus many more!

CURRENT FEATURES:

- **No data entry! Uses files from Past Performance Plus**
 - **Calculates Automatic Contenders**
 - **Automatically recalculates after scratches**
 - **All of the past performance for all horses**
 - **Prints all past performances**
 - **Saves to Fractals format**

NEW FEATURES:

- **Faster calculations**
- **View Morning line odds, APV%, and workouts!**
 - **Pace of today's race and Dream Race**
- **Match Up of contenders again at today's pace**

INTRODUCTORY PRICE:

\$139.95

UPGRADE FROM CURRENT VERSION OF XTOR: \$19.00

CA RESIDENTS, DON'T FORGET THE 7.75% SALES TAX

PRICES GO UP OCTOBER 10, 1994

This does not mean that you need an update. Your old XTOR will continue working for you just as it is. The new features are there because so many subscribers *asked* for them. The additional programming cost was quite expensive, but in offering it for just \$19.00 mor to current XTOR users, we're eating the added expense to make the new features available to you at little cost. Note the October 10 deadline on this reduced price. After 10/10/94 the XTOR ver 2.0 goes to \$149.95 to new users and \$59.95 to those who want to upgrade.

Several downloading services have gone out of business in the past month because Bloodstock lowered their price to diminish competition. The reason that other services could no longer compete with Bloodstock is that they were trying to make a big profit from their downloading service. Past Performance Plus, on the other hand, is designed as a minimum profit service to YOU. For that reason, it stays alive and well while others are folding. In fact, take a gander at this:

BEGINNING AUGUST 1, 1994, THE COST OF DOWNLOADING FROM

PAST PERFORMANCE PLUS HAS BEEN REDUCED TO

\$80 A MONTH FOR UP TO 10 TRACKS! \$150 FOR 2 MONTHS!

...That's \$8.00 a month per track! This makes PP+ by far the absolute lowest priced downloading service in North America – or the world for that matter!

A WARNING! FROM JIM BRADSHAW

**YOU MUST ERASE YOUR OLD XTOR PROGRAM FROM
YOUR HARD DRIVE FOR XTOR 2.0 TO WORK.**

**XTOR 2.0 WILL NOT LOAD
WITH THE OLD XTOR STILL ON YOUR HARD DRIVE!!!**

**See Spencer's Computer column for instructions
on the erase procedure. They're also on the PP+ Bulletin Board.**

NOTE FROM THE REV. BERT MAYNE

Since many of you expressed disappointment at our not going to Albany and Saratoga this year, Bert is planning a little Saratoga party which will include a one man workshop in preparation for a day of fun and winning at the Queen of North American Race Tracks. If you're interested, CALL BERT NOW for details: 518-234-4953. It should be well worth your while because I'm sure he'll throw in a little Silva Mind Control at no added charge. Next year we'll probably all go back to Albany/Saratoga despite the expense.

OKLAHOMA!

...where we'll come crashing down the plains in October for the 6th annual Oklahoma Seminar in Oklahoma City at the 5th Season Hotel on September 30, October 1 & 2, 1994. Those of you east of the Rockies will be receiving a flyer with full details. Anyone wanting a flyer who is not in the mailing area, just call or write and we'll send one out (flyers should be ready mid-August).

Yup, it's time for me to brush up on that Okie Dictionary Jim gave me a few years back. On accounta ah don't wanna be talkin' with a Yankee accent down thar. Not surrounded by Jim "the hat" Bradshaw and his Oklahoma Mafia gang, including Tony Rust, the Past Performance Plus downloading man and Tom McCrae. Let Tom Brohamer, who'll be there, be the only one who speaks with an accent. Spencer Toner might be able to make it, too, dragging his computerized overhead projector apparatus. But his native Indiana tongue usually gets him by south of the Mason Dixon line.

Q&A WITH THE DOC

I'll combine this issue's Q&A with this column because all the questions received since the last Follow Up were about what we previously were calling POR/POH. Well, we've improved it tremendously and it's now ready for sale as **QUAD-RATER©**.

Here's what a few of the testers have to say about the program:

"The greatest advance in computerized handicapping since DC Pars became Entropy. Until you told me otherwise, I thought this was the perfected version of Fractals. Now we have three of the four elements of Chaos physics. When Fractals is finalized we'll have fit together all the pieces of the eternal puzzle..."

Sam Wada

"Howard, you've really done it this time - taken something you've been telling us to use since 1983, POR/POH, and turned it into a masterpiece. Hooray! I don't have to spend so much time keeping a model anymore. By itself, QUAD-RATER is great but when I copy it to Thoromation it's really miraculous."

Ginny Butler

"Just look at my readouts and the long priced results it gets. It also gets the low paying horses that win so often. What else could anyone ask for. Of course, I still copy it to Thoromation for added confidence and bigger bets. I was skeptical when you first said it, but now I fully agree - Quad Rater does explode the myth of an Early-Late Bias dichotomy. It works regardless of so-called bias."

Tony Hill

"I salute your genius for creating the most astoundingly predictive program imaginable. It is the true epitome of the Handicapping Revolution. I download from Past Performance Plus through XTOR and then, for double safety and added effectiveness, copy to Thoromation for confirmation. The Long Shots come in droves but on days when there are nothing but low paying mutuels it gets them too."

Phil Gowens

"Phenomenal by itself, but used in conjunction with Thoromation it's awesome. Ups my percentage of true contenders and win horses considerably. Gets those big exotics too"

Troy Panzarini Doc's comment: see Troy's article, this issue.

"The formulas may be Complex, Chaos and Fuzzy Logic, but the program is SIMPLE. I told you so. Now I've found something that picks contenders and pace lines like nothing else. I download from XTOR to PP+ and after copying to Thoromation to get the race in pictures, I call the off track wagering center in Connecticut and bet like crazy. At last I'm winning some real money with hardly any work. QUAD-RATER is simply great."

Spencer Toner

"Quad-Rater is the FIRST program I've fallen in love with since Ultra-Scan, and you know the extremely high regard I have for Thoromation. Your goal of virtually eliminating any need for adjustments has been achieved! And that's a GREAT ADVANCE in handicapping."

Glen Connolly

The questions we received have to do with qualifiers and the opening screen options. If you hit 2, you go right to Pace Line Entry. If you hit 1 you get this screen I filled out with an old race won by FAB.

1=Class & SR/Beyer 2=Pacelines 9=Exit

CTR=Contender FIN=Actual Finish

The basic qualifiers are:

- 1) Any horse with an 80 speed rating or within 2 based on the Median speed rating of the entrants. At certain tracks there are races at some tracks where almost no horse has an 80.
- 2) Any horse that won or was within one length regardless of speed rating.
- 3) Any horse that ran against an inordinately fast pace no matter how many lengths it was beaten. This horse should have a good speed rating despite its finish.
- 4) You can qualify off the APV, Class, Speed Rating and Beyer numbers screen using the best of the last three lines at a comparable distance. Many will also want to use comparable Class and surface, as well.

In my own handicapping, however - as well as in Shane's - we often use dirt lines in Turf Races and vice versa when their running styles dictate. When there are no comparable distance lines, the program has an automatic extractor. Sprints from routes and an automatic projector, sprint to route.

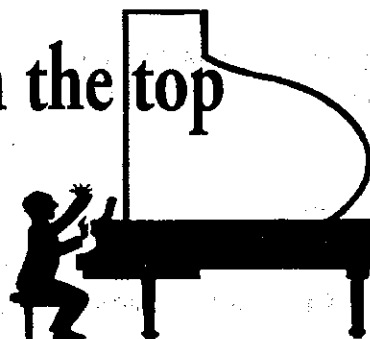

Be sure you enter 3 year best times from the track you're working most frequently and enter 0 for speed rating. Insert the Daily Variant and the proper speed rating will appear automatically. If the race is from a different track the speed rating will be adjusted to today's track - the one you entered the three year best times for.

The best thing about the entry format is: All instructions appear somewhere on each screen - usually at the bottom.

The program will come with thorough documentation on how to use all of its aspects, plus a manual of instructions and example races. (Wow, are there some great ones). We've dedicated the races in this issue to QUAD-RATER used in concert with our advanced 4 call programs, especially Thoromation, Synergetic Match Up II and Entropy II. You're about to see the power of such marriages.

Once again...

from the top

A Special Series of
Articles for Beginners and a
Refresher Course for those in need

ADJUSTMENTS

Part II

Last issue I promised to discuss the **ULTIMATE** way we *currently* adjust pace lines for optimal success. I stress *currently* because we are in the process of producing an even superior procedure.

I'll also discuss in this article the delicate problems of **DISTANCE CHANGE ADJUSTMENT PROJECTIONS** and the most successful applications that we've applied over the years.

In our salad days we provided charts for every North American track denoting the feet-per-second from any distance to any other distance. The prescribed adjustment was then entered into what we called: OPEN ADJUST. Making these charts took a lot of work and research and they were subject to yearly changes. Clients by the score proclaimed that they worked quite well through 1984. But by that time the pirates and other imitators were utilizing our material and research. Then our adjustments began to lose their profit edge. So we researched other, more universal and profitable adjustment procedures.

The ones used in **ULTRA-SCAN** proved best and we've been fine tuning them ever since.

So now let's fast forward to today's procedures.

ADJUSTMENTS:

Raw = The pace lines as entered translated into Velocity, Energy or Chaos Formulae
Auto = Total Energy is NOT equalized. The 1st, 2nd and 3rd Fractions receive a given percentage of the difference between each horse's Fractions, and the comparable Dream Race Fractions.

2nd Call = Average of 1st and 2nd Adjusted Fraction, NOT 2nd call itself, adjusted as above

IF a sprint line is used in a route then the difference between a contender's Sprint Fractions and Dream Race Fractions is applied to Sprint line.

AUTO-S - Used in Phase IIA, **QUAD-RATER** and **FRACTALS**

FIRST, Total Energy is *equalized*. Then a pre-calculated **AUTO** adjustment is distributed by the *exact* percentage of Energy expended by each individual horse by fractions.
2nd Call = Adjustment as described above applied to the *average* of the 1st and 2nd fractions.

ALTERNATE (2) Used in Synergetic Match-Up II, Entropy II and **EXDC/KGEN** with Thoromation.

Total Energy is Equalized. All 3 fractions each get the prescribed apportionment applied equally on **EACH** fraction. The amount given is based on the difference between the horse's fractions and the **MEDIAN** of the Dream Race Fractions. This difference is then calculated and divided appropriately.

APPLICATION OF THE ALT. (2) ADJUST - This will often overly advantage slower horses or penalize faster contenders. However, when the entrants are all *true* contenders, the adjustment keys many longshots.

I won't offer the precise divisions, percentages and apportionments. They would advantage the pirates too much and reduce our edge. However, they are all in your advanced programs and have been since 1988.

AUTO PROJECTION from one distance to another:

Sprint to Route. The quickest and simplest way is to merely use the 2) ALT Adjust. In QUAD-RATER there is an automatic SPRINT-ROUTE adjuster as well as an AUTO Route-Sprint Reduced. Press 1 when asked if you wish to utilize it.

Extract Sprint from Route 1=Yes 2=No

And the router is *now* a sprinter.

TE 01-01-1989 RACE 1 DIST 6 SURF D PURSE \$12,500 FU46													
PACELINE DATA ENTRY													
# NAME	L	DIST	S	1stC	2ndC	3rdC	Fn1C	BL1	BL2	BLS	BLF	SR	TV
1 AAA	1	6.0	D	22.0	45.0	56.4	110.0	4.00	3.00	2.00	1.00	94	17
2 BBB	1	6.0	D	23.0	46.4	58.3	110.4	0.00	0.00	1.75	1.75	89	14

In Synergetic Match Up II, Entropy II and EXDC with KGEN & Thoromation, the AUTO Projector does an excellent job of projecting the time differences between Sprint Distance from 5.5 to 7 furlongs. It does equally well for Route distances from a mile to 9 furlongs. In many areas using it to project Sprints to Routes makes the sprinters *too fast*. However, if you apply it here you'll never lose a race in which a sprinter goes against routers.

AUTOMATIC PROJECTOR Y/N ? Y

#	NAME	DIST.	1ST CALL	2ND CALL	3RD CALL	FIN. CALL	1st B/L	2nd B/L	Stretch B/L	Final B/L
1	8F	<u>8.0</u>	22.3	45.4	110.4	135.1	2.0	1.0	1.0	0.0
#	NAME	DIST.	1ST CALL	2ND CALL	3RD CALL	FIN. CALL	1st B/L	2nd B/L	Stretch B/L	Final B/L
1	8F	↙ <u>9.0</u>	45.4	110.4	134.5	147.4	2.00	1.00	1.00	0.00

To get the proper adjustment indicator you MUST hit the Y for yes when you see the Kinetic or (Energy) Generator Y/N question. When you do so these programs offer three choices for adjustments on the screen:

Energy Generator ==> y

SELECT TYPE OF ADJUSTMENT

- 1) AUTOMATIC ADJUST ALL HORSES
- 2) ALTERNATE ADJUST ALL HORSES
- 3) MANUAL ADJUST ALL HORSES 1 ✓

The program defers to (1) Auto Adjust. If this is the appropriate adjustment, merely hit enter (or return, depending on the computer).

When the (2) Adjustment is called for you will see this message:

The difference in the
total Energy indicates
you may need to use the
manual adjustment.

CAUTION

Make sure the horse
is a true contender
before using the
manual adjustment.

SELECT TYPE OF ADJUSTMENT

- 1) AUTOMATIC ADJUST ALL HORSES
- 2) ALTERNATE ADJUST ALL HORSES
- 3) MANUAL ADJUST ALL HORSES 2 ✓

The caveat on screen two suggests that you reevaluate the pace lines you have entered, possibly weeding out false contenders. If all horses belong in the race, the (2) Adjust can be a big profit maker. If NOT, you may be elevating inferior horses to the top.

Pressing (3) gives you the **gross amount of adjustment** that will be applied according to formula to each contender:

SELECT TYPE OF ADJUSTMENT

-
- 1) AUTOMATIC ADJUST ALL HORSES
 - 2) ALTERNATE ADJUST ALL HORSES
 - 3) MANUAL ADJUST ALL HORSES 3 ✓
-

In this case we see that the faster horse, *Maxi* gets an adjustment of 0.97, while *Caj* receives 1.04.

NAME ==> MAX1

Pace Adjustment is ==> 0.97

(ENTER) Accepts Adj. or (E)nter Own Adj. ==>

NAME ==> CAJE2

Pace Adjustment is ==> 1.04

(ENTER) Accepts Adj. or (E)nter Own Adj. ==>

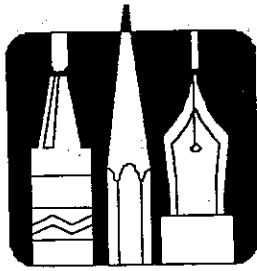

The 3 adjust can also be used by superior handicappers to make one's own adjustments. Thus far, over the past five years, I have yet to witness *anyone* who has improved their results by so doing. It's NOT recommended. Anyone who does insist on using this function to make subjective or Par type adjustments must do so at their own risk and can expect no help from us for the consequences.

For now, except in **QUAD-RATER**, do not attempt to project from below 5.5 furlongs or above 9 furlongs. Also don't try projecting Mile 40 and Mile 70 races or 7.5 furlong races. Of course they can be projected or regressed mathematically but mathematics alone do not a winner make. We ARE working on it, however.

Over years of testing we have managed, at last, to create **FRACTIONAL DIFFERENTIALS** for each distance, dirt or turf. In the broadest sense of the word, these constitute **UNIVERSAL PARS**. Not **TIME PARS**, but **FRACTIONAL DIFFERENTIAL PARS**. These are based on universal laws of deceleration and have proven successful at ALL tracks tested, including those of less than a mile circumference. They also apply to turf races and off-tracks.

They are currently being used in **QUAD-RATER** and the still-to-be perfected **FRACTALS** programs. They will also be utilized in a very simplistic version of the Methodology – a superior version of Phase I with feet-per-second ratings and proper designations for beaten lengths. Jim Bradshaw is busy applying a procedure for other advanced programs, such as Thoromation IIA that may prove best of all.

Next Issue: Tandem Races and a discussion of Win and Counter-Energy: Keys to Exacta, Quinella and Trifecta profits. Then, starting with Follow Up 48, we'll begin a multi-part From The Top series on interpreting readout and optimal betting strategies from all of our currently available computer programs for Phases 1 through VII. Included will be a dictionary of Sartinese terminology.

FROM THE
**Editor's
Desk**

Recently a client shared their own process of handicapping and a difficulty surfaced that keeps recurring with many clients.

The client with great determination decided to make their handicapping produce the results they knew they were capable of producing.

Impeccable records were kept, and all of the advanced tools of the Methodology were used (Including the use of ENTROPY, EXDC w/ THOROMATION, FRACTALS, downloading from PP+, +s and 0s, track models, decision models and a check off work sheet to coordinate all of this mass of information and data). An account was opened with the OTB people in Connecticut. The Connecticut account was opened so as to not be stressed by the betting crowd that triggers confusion. And finally plenty of time was allocated to do the work.

Mind you, this was being done on paper not with money. The records were very impressive. A friend kept the results charts out of sight and only gave the client the names of the horses scratched. The handicapping done the friend revealed the winning horse's name and the mutuel price. Records were updated and then the next race handicapped. The process was comfortable and the results were great.

Now the time to start betting was at hand and the client was at total ease about their handicapping and the expected results.

The first day of actual betting money, was, now at hand. This first day was a Saturday, with no day job to interfere. First an errand in the form of a trip to the post office, then home to handicap and bet. Post time was near, not to tarry, so quickly to the task.

Three bets were made. And the results.....all bets lost.

What happened, and after such great preparation?

In analyzing the problem it became evident that something changed from the great results on paper and the actual betting.

*It was the trip to the post office, and then a slight feeling of *panic* when not enough time was allowed for the actual handicapping and the races were lost.*

Re-running the races the client found given the same conditions and consideration as the original training and practice all three races would have been won.

In talking to other clients - they too have the same experiences.

The client was good enough to share this experience. Letting us know of such an experience helps us know our own failings are not that unusual. The rest of the story is predictable. Now the client sets the same kind of controls of time as the controls that were in place for handicapping and is now getting the expected winning results.

More of the story.....

The main idea I got from the client was the process used to make decisions. The client used every tool available and once the initial work was done all the print-outs were assembled. Through record keeping over an extended period of time, certain factors from the read-outs indicated (because of the clients choice of contenders, pace-lines, projections and adjustments) which factors identified the winner most often. Not falling into the trap of looking at one or a few factors, all of these identified read-out factors were used. They would be different for a client who selected contender, pace-lines, projected and adjusted differently. Only an individual clients records would be accurate as to which factors to use.

Now an important concept surfaced. Recently TV coverage was dominated by the O. J. Simpson hearings. In watching the hearing evolve a legal term was used that I believe fits here. The term used by the prosecution was, " *preponderance of evidence*".

How this client used *preponderance of evidence* to make decisions in that not one factor alone (which surely fails from race to race), but all the viable factors point to two horses to bet. Circumstantial evidence from before the race, and evidence in such preponderance tells which horses can win and do, proven in the race itself.

This is easy to do. Just write down the name of the top two horses of each viable factor determined from records. The client used many factors from EXDC w/ THOROMATION, ENTROPY and FRACTALS. The two horses whose names appear the most win as the clients win record testifies in the court we call the race track. To reiterate, one piece of evidence is not enough, but a *preponderance of evidence* is.

Testing this concept and finding it viable with 21 factors I gleaned from the new program QUAD-RATER and EXDC w/ THOROMATION I am able to reflect spiritually. God would have an infinite number of factors with perfect knowledge. Therefore, God knows all, and the preponderance of evidence always points to the winner of the next race.

Jim Bradshaw wants all to know about installing the new AODDS on your hard disk drive.

Before you install this program you need to delete the older version from your hard disk drive. Once the old version is deleted it is then ok to install the new version.

STATISTICAL SURVEY – WINNERS

RECENCY AND CONDITION – 5,000 RACES

3,160 ran last race within 15 days of today	63.32
4,216 ran last race within 29 days of today	84.30
785 ran last race over 30 days of today	15.70

CLASS – 5,000 RACES

4,000 ran in <u>same</u> class as last race or <u>lower</u>	80%
1,000 ran in <u>higher</u> class than last race	20%

FINISH IN LAST RACE – 5,000 RACES

2,926 finished first, second or third	58.5%
3,014 finished within 2 lengths and gained in the 2nd (turn time) and/or 3rd fraction	60.3%

AGE - 3 year olds against older – 2,000 races

1,538 winners were 4 year olds and older	76.6%
462 winners were 3 year olds	23.1%

DISTANCE – 5,000 RACES

2,584 ran <u>same</u> distance as last race	51.6%
1,367 ran <u>longer</u> distance than in last race	27.3%
1,049 ran <u>shorter</u> distance than in last race	21.0%

SEX – 2,000 RACES – MALES VS FEMALES

1,513 won by males, colts, geldings	75.6%
487 won by females	24.3%

For Place Horse (not winner who also placed) statistics see the 55% SOLUTION manual.

**HEY !!.....**

LET'S DOWNLOAD

To control the process of downloading from Past Performance Plus the computer will need a communication software program to control the computer, modem and the telephone line. Procomm Plus is the most popular of the commercial programs available. This print-out of the screen shows the menu of choices. Once the program is installed the next step is to (Alt-D) go to the dialing directory.

THE DRAMATIC NEW QUAD-RATER PROGRAM Tutorial

Today's race is a mile 3/8th on the turf at Golden Gate but all the contenders have been entered at their 9 furlong time. It's the Golden Gate Grade II Handicap – Purse \$300,000

QUESTION - Can a horse beaten with a 78 Speed Rating on a 22 Variant, beaten 3/4 of a length WIN over a 101 Speed Rating with a DV of 7?

SAM WADA's answer is YES! He won the race and the \$99.50 Exacta because the WINNER ranked Number One on **QUAD-RATER's** Long Shot Detector. The Place horse ranked Number One on the Pace of Horse Power Rating. You'll see the Entry Lines and Sam's readouts on the next page.

First **QUAD-RATER** ranks three different aspects of the race:

- 1) The Power of the pace against which each horse ran.
- 2) The Power of each horse's OWN pace.
- 3) The Long Shot Detector

All these are Raw figures which produce the Two Line Graphs indicating the Rank of each horse in the above three categories. As you will see, the Place Horse *Fano*, has the #1 Pace of Horse Power Rating. *Alex*, the Win horse has the Number One Long Shot Detector Ranking.

The fourth aspect of **QUAD-RATER**, hence the *QUAD*, is the dark bar graph which is subject to TWO Adjustments - AUTO and AUTO-S. Sam just used the AUTO here. The winner ranks 2nd, the place horse, 3rd (3 horse Exacta box = \$99.50).

Actually, the RAW rankings - *no adjustment* - were superior - as they often are, as we have stated since 1982.

To copy the race to Synergetic Match Up, Thoromation or any other 4 call Sartin program: Just place your Thoromation or other 4 call program into the disk drive and press 3. Then hit F1, get out of QUAD and into your other program and, in this case, enter - GG061807 (what the program names the race) and *bingo*, you're in the new program.

We'll use this procedure for several races after Sam's to show **QUAD-RATER's** ability to get both short and long priced horses as they came.

SAM WADA

AS SO OFTEN HAPPENS, THE RAW LINE GRAPH SCREENS PRODUCED BETTER RESULTS THAN THE ADJUSTED GRAPH. THE PLACE HORSE IS NUMBER 1 ON THE VELOCITY POWER GRAPH AND THE WIN HORSE IS THE NUMBER ONE LONG SHOT POTENTIAL. THE DARK GRAPH GETS THE WINNER SECOND.

The NUMERAL After Each Horse's Name is the PACE LINE used to enter the horse. Note that SAM never went back more than 3 (ASAN) and most often used the LAST RACE. This is a Fail Safe Readout to keep you from entering the "Way Back Machine." Never again will there be any question as to WHICH line was used.

DOC SARTIN

HERE IS A TYPICAL DAY AT A MAJOR TRACK. THE AVERAGE WIN MUTUEL FOR THE FIRST SIX RACES, INCLUDING THE 1ST RACE FOR MAIDENS WITH FIRST TIME STARTERS IS \$5.95. ALL EXCEPT THE FIRST ARE EASY TO GET. THIS IS THE KIND OF DAY WE'VE LEARNED TO EXPECT. SO, WE MUST CAPITALIZE ON THE LAST THREE RACES.

WE CAN DO NO BETTER THAN GET THE SHOW HORSE IN THE 8TH AND THE 9TH IS FTITIED WITH FIRST TIME STARTERS. SO OF THE TWO PLAYARIF RACES WON BY LONGER PRICED HORSES, WE WIN ONE AND GET THE FIRST THREE FINISHERS 3-2-1. THE WIN PAYS \$20.40, THE \$2 EXACTA \$198 AND THE TRIFECTA, \$233.

HOL 07-15-1994 RACE 7 DIST 7.5 SURF D PURSE \$41,000 TEST
CHAOS FORMULA AND LONGSHOT RATINGS

31

PLEASE NOTE THAT I USED EVERY HORSE IN THE RACE OFF ITS BEST SPEED RATING OF THE LAST THREE AT A COMPARABLE DISTANCE. I PERSONALLY DO NOT USE THE BEYER NUMBERS (Not Made Here, syndrome). ALSO IF THE SITUATION WARRANTS, I'LL USE DIRT HORSES IN TURF RACES AND VICE VERSA, DEPENDING ON RUNNING STYLE.

I WENT BACK 4 LINES ON JAZZ BECAUSE ITS LAST THREE WERE ROUTES. I COULD HAVE GONE BACK 5, BUT WHY CARRY COALS TO NEWCASTLE. 4 LINES BACK FOR DOC MCCOY AS WELL. LAST WAS 5.5 TURF, 3 BACK BAY MEADOWS, 4 BACK, SANTA ANITA, A TRACK COMPARABLE TO TODAY'S. BLINK WAS HIDDEN BECAUSE IT DID NOT MAKE THE TOP 4 IN ANY READOUT.

THE RESULTS

4554

SEVENTH RACE. 7½ Furlongs Purses \$41,000. Claiming. 4-year-olds and up. Claiming price 62,500-55,000

DO I CONFIRM THROUGH EXDC/THOROMATION OR SYNERGETIC MATCH UPII?
A RESOUNDING Y E S! ESPECIALLY FOR EXACTA AND TRIFECTAS OR ANY OTHER SUBSTANTIAL WAGER. OFTEN I'LL ALSO COPY TO ENTROPY AND POSSIBLY WEED OUT AN ADDITIONAL HORSE. OUR ADVANCED 4 CALL PROGRAMS SELDOM LOWER A HORSE'S RANKING BUT THEY FREQUENTLY RAISE THEM, AS YOU'LL SEE IN A MOMENT.

NEXT PAGE; A VERY IMPORTANT ANSWER TO AN IMPORTANT QUESTION.

IF THOROMATION, et al, SO OFTEN GETS THEM, WHY QUAD-RATER? THE ANSWER IS THREEFOLD;

- (1) BECAUSE IN USING QUAD-RATER YOU'LL H A V E TO ENTER THE HORSES THAT ARE SO FREQUENTLY ELIMINATED BY MOST CLIENTS.
- (2) USING QUAD-RATER WILL TELL YOU WHICH 4 CALL PROGRAM SCREEN TO USE. THIS IS A BIG PROBLEM FOR MANY.
- (3) QUAD RATER WILL INDICATE WHICH THOROMATION ADJUSTMENT TO USE. WHEN THE RAW LINE GRAPHS ARE SUPERIOR THE (1) ADJUST IS EVIDENT. WHEN AUTO-S IS SUPERIOR IT WILL LEAVE NO DOUBT AS TO THE USE OF THE (2) ADJUST OR OPPOSITE SCREEN PROCEDURE.

THE BOTTOM LINE IS:

ALMOST N O N E OF US, MYSELF INCLUDED, WOULD EVEN CONSIDER MOST OF THESE LONGER PRICED HORSES W I T H O U T THE AID OF QUAD-RATER!!!

IF POSSIBLE, THE NEXT DAY, SATURDAY, WAS EVEN WORSE THAN FRIDAY. MAIDENS WITH FIRST TIME STARTERS, 6 FAVORITES AND ONLY TWO PLAYABLE RACES THAT PRODUCED WORTHWHILE PRICES. THE 5th AND 7th. LET'S LOOK AT THEM:

THE 5th: I USED VIRTUALLY EVERY HORSE IN THE RACE. THE COMPOSITE SORTER NARROWED THE RACE TO THESE CONTENDERS;

VOX POPULI

THE CLIENTS SPEAK

Dr. Sartin,

I called Ginny (Butler). She told me she was testing a new program called Fractals for you and needed help as she just did not have enough time to do it for you. ...She has a nice computer set up, so I worked with her at home...then I went out and bought myself a nice home computer, monitor and printer.

...After having worked with the Fractals program, the KGEN program makes a lot more sense to me. The past two weekends I have had two \$800+ days. I hit both Trifectas and a few Exactas for about \$1000 total last Saturday. I have also hit three triples totaling \$744. Working with the Fractals program has certainly helped me and also reading through my old Follow Ups and some that Ginny loaned me.

...I have never studied any other method; so all I know I owe to you and your colleagues.

Again, thank you: and I hope you enjoy Little Tree as much as I did. My Aunt Ida actually lived in a "dog trot" house such as the one described in the book.

R. M., Washington

DOC'S COMMENT: R.M., a Native American, sent Jim Bradshaw and me a wonderful book *The Learning of Little Tree* with the inscription that we know "The (Indian) Way"

Howard,

I thought you might like a Thoromation report from Sam Houston Race Park.

A little background might be in order here. I am currently handicapping full time. The company I worked for was recently dissolved. The partners became greedy, began to argue and sue each other, and put a lot of people out of work. I've had my fill of greed, lawyers, depositions, etc.

This brings me to the opening of Sam Houston.

The first two weeks I made small bets while I got adjusted to the track. Starting May 15, I significantly increased my win bets. Since more money was on the line, I found myself becoming more selective in my betting.

Of the races I actually bet on, I won 70% with an average mutuel of \$9.00. I did not use any one Thoromation screen for my selections. My two (sometimes three) betting choices would also be influenced by my model. Seven furlong races became my favorite distance, because the model would often eliminate favorites who can't win. The third fraction was deadly in many races.

Howard, I have told you this before, but it is certainly worth repeating. I am deeply grateful for all your help. Everything I've learned can be attributed to you. I know of no one else who honestly wants to help people the way you do.

Best Regards,
A.A., Texas

Doc, I love the Follow Up. I never want to be without it. The Doc may not be a God - but if God were to take on a human form, I'm sure he would choose to look like Doc Sartin.

Thanks for all the work you all do to make life a better place for struggling handicappers everywhere.

Regards,

NB, Washington

DOC'S COMMENT: I appreciate you comparison with God, but actually She looks more like my daughter, Mary, who says that there is God in all of us.

Dear O. Henry House

...I have a large sample of generic races done with accurate data. Perhaps Howard would be

continued next page

interested or these numbers may be assistance to other clients.

(AODDS)

Jimmy's top 4 (inc. ties) PRC #5, winner is in 87% of the time.

Jimmy's contenders (XTOR) of the 3 to 5, they win 82% of the time.

In finding the winner, I find Thoromation the strongest indicator (Running Screen). Top 2.

Confirming screens which are very indicative are Paradigm Presser and Sustained. EXDC Deceleration Screens: in top 3 or 4 of the 4 bar graphs. Any "Even" UXR #s (i.e., 146-146). These I've found to be the strongest indicators. Also, by eliminating any 5th or 6th highest # in Entropy sort seems to get rid of false horse before putting the remaining 4 "real" contenders into Thoromation. By doing this, a very small percentage of winners were eliminated. I feel confident about this.

This (and many other procedures) were tested on claiming races, Alw., dirt or turf races. No Mdn races or Mix distances were done...these were all levels of Claiming races from FRL, CD, APX, LAD, HOL, GG, PLN, MTH, done the last 2 weeks of June thru' July 6, 1994.

I hope this data can be of some help. Please let me know if I can do anything to help in any way further. I do many races.

Thanks sincerely for all of your support over the years - beginning in 1984.

My Best,
E.A., Nevada

FROM A THOROMATION USER:

...The 2 Adj. has gained me many more double digit mutuels than I would have achieved otherwise (Thank you J.B.)

Jim Bradshaw's off hand remark (on the phone) have sounded like casual talk but to me after hanging up they turned into \$19.80 and \$27.00 mutuels I would never of had. He would be hard pressed to figure out what he said to me that was so key, but I can assure you both that your honesty with a student has paid dividends.

Cordially,
J.O, Washington

Dear Dr. Sartin,

I tried to reach you by phone, but you were out of the office. I want to thank you for accepting me into your Methodology Program.

I've been using this for about 3 weeks and have had unbelievable success. Thank you again.

I'm 70 years old (young) and I've been losing at the horses for 50 years and thought I was going to kick off without finding the answer. But...you came along, accepted me and have made me feel younger than young and happier than happy.

I could go on and on raving about your work but I'm sure you've been told so many times before.

So very grateful and thrilled to have this Methodology to see me through many more productive years.

T.P., Florida

DOC'S COMMENT: Proof that you're never too old to learn new concepts.

FROM A FRACTALS TESTER:

Dr. Sartin,

The Fractals program remains a dynamite predictor of winners of horse races when I do my part.

1. This week has been one to fine tune my understanding of the program and to learn when to alternate adjust and when to read the Chaos screen.

2. Of the two Auto adjusts - #3 Auto M is slightly more predictive for me.

... I have signed on to Fractals.

S.P., California

I wish Doctor Sartin would make some audio tapes on Win Therapy. When I listen to the seminar tapes I always listen to Doc's portions the most, over and over. This is where I get my inspiration from.

Thank You Very Much

J.H., Nebraska

DOC'S COMMENT: We're working on it now - both audio and video.

Dear Dr. Sartin:

I (am) finally submitting my first Thoromation client report. I am now living in Mass. for the summer and betting at Rockingham. I received Thoromation in January, but unfortunately up till now, illness has prevented me from betting at the track. The stop action pre-play has helped me in finding the in-the-money horses and has uncovered a new area of profit for me, previous to this I was really never much good at finding the place or show horses and did not trust myself to bet on them. I am including my (1.67 R.O.I) betting record for the twenty races that I used in making my Thoromation client report. Thank you for your continuous advice in the Follow Up as it helps to reinforce good work habits.

Sincerely,
J.S., Florida

Dear Howard,

Thanks for providing me with a handicapping crown jewel - EXDC/Thoromation - please let me know if I may purchase a back-up copy to put in a safe deposit box in case I lose the one I have. Enclosed is my best report yet.

Sincerely,
L.W., California

COPY OF LETTER FROM AN OLD CLIENT
TO A NEW CLIENT

...I am enclosing the announcement of the subject Seminar in your area. If you elect to go I will ask Dr. Sartin and/or Jim Bradshaw to give you special attention and guidance. While I cannot guaranty it, in the past all those who attended the track on the last day, have either won the amount of the Seminar or more. Let me know so I can set things up with Dr. Sartin.

If things work out as they should, and I believe they will, this would eventually give you an additional income (there is no such thing as too much) and a world of pleasure, because you will be a winner.

A.J.P., Louisiana

Dear Doc,

...INSPIRATIONAL! EYE OPENING!! The Las Vegas seminar was my first. My first encounter with PIRCO as a living, breathing entity beyond 1-3 p.m. at 845-5907. I went to see, to hear, to meet. I did, I did, I did. I saw, heard and met PIRCO teachers and PIRCO members, new like myself and seasoned as well. I saw a group of successful "horseplayers". I heard them speak of their intensity of application and the success it has brought. I met them, spoke with them, learned from them. I met others who although not at the level of the instructors are earning serious money at the track. I met some who are not. My eyes are wide open, my ears are attuned. My senses seeking encounter. I have met a challenge, set a goal encountered a method of attaining "freedom".

I look forward to continuing a relationship with PIRCO and its members. Personally, even for as long as I have known you (some 10 years or so) I have believed that one could earn a living at the track. From your belief I know some of the reasons the why's of my studies.

One of the most enjoyable things about PIRCO is to be able to read and talk about horses in a group that accepts the reality of winning as an occupation and an intellectual pursuit. It's fun to open the mailbox and find another issue of the Follow Up or a manual.

In closing I express my gratitude to you for sharing the copy of your EXPO '84 paper which 9 years later finally brought me into the fold of PIRCO.

Thank You Doc,
D.M., California

QUAD-RATER + THOROMATION = 300 REASONS IN ONE RACE

BY
TROY PANZARINI

When I first started using QUAD-RATER, I immediately knew that this was a dynamite program with many awesome capabilities. My biggest challenge was to decide how to incorporate it into my evaluation process. After running 10 to 20 races, I immediately knew that it could be used as a stand-alone program. Since I enjoyed using Thoromation so much with success to match, I decided to merge the two together.

The example race that follows is the result of this process. I ran the improved APV and S/CR for each horse in the race. I then chose the highest speed rating in a comparable distance and surface trying to go no further than 4 races back. The pacelines were then entered as is, not adjusting beaten lengths. I then imported the race file into THOROMATION using the copy command in QUAD-RATER. The screens of each program were then evaluated. Let's take a look at the 6th race @ HOL on July 2, 1994.

\$ Notice that the top APV horses are: Argol, Timba, RFria, WildI, and Littl.

\$ The top S/CR horses are: Argol, Littl, RFria, Timba, and Pollo.

\$ Using the SR/TV/BYR line scores we have Argol, Sceni, Timba, Littl, and RFria. If you are following along closely, you are noticing a pattern that will prove quite profitable.

\$ The paceline entry is almost identical to the other programs with the exceptions of indicating the line number used, using actual beaten lengths, and entering the SR and TV.

\$ Notice that Timba and Press do not show up on this printout. I originally used all of the horses and then excluded the ones that did not show in the later print outs that follow.

\$ You will see that the difference in Total Energy is quite vast for the contenders. I know that the alternate adjustment (AUTO-S) will need to be used. Notice that the race only contains one true SUS horse, Pollo.

\$ This is an awesome readout as we have both Feet Per Second and Energy together. This is quite valuable information to further separate contenders or see if the top horses have the capability to meet the demands of the track.

\$ The Por/Poh readouts give the numerical progressions of how each horse compared to the pace of the race it ran in, the pace the horse displayed, and the longshot potential that the horse might be capable of today, considering these factors.

\$ The CHOAS FORMULA AND LONGSHOT RATINGS readout gives us a graphical display of this vital information. Notice which horses seem to be most prominent.

\$ The CHOAS FORMULA POWER AND LONGSHOT RATINGS COMPOSITE readout is a nice compact analysis. Included is a Wire to Wire notation as applies.

\$ Now for the fireworks! The QUAD-RATER MATCH UP AUTO AND AUTO-S are just plain awesome. I have listed the AUTO, although this race needed an AUTO-S adjustment. Notice how Pollo, Argol, and RFria are ranked.

At this point, I will now check this race in THOROMATION.

Remember, if the total energy from high to low is greater than 2.0 you may need to use the alternate adjustment.

CAUTION

Make sure the horse is a true contender before using the alternate adjustment.

EXDC

\$ The bets in this race were easily to 60/40 dutch between RFria and Pollo and an exacta box with RFria, Pollo, and Argol. Readout experts, such as Doc, would have also seen the pattern with WildI and bet the horse to show.

\$ The combination of QUAD-RATER and THOROMATION gave us the winner in RFria, paying a phenomenal \$47.20 and the exacta of RFria/Pollo, paying \$300.20.

\$ Even the show price for RFria, \$7.00, is more than most win prices at HOL these days.

SIXTH RACE Hollywood JULY 7, 1984

1 1/4 MILES. (1402) 16th Running of THE AFFIRMED HANDICAP. Purse \$150,000 Added (Grade III). 3-year-olds. By subscription of \$100 each, which shall accompany the nomination, \$1,500 additional to start, with \$150,000 added, of which \$30,000 to second, \$22,500 to third, \$11,250 to fourth and \$3,750 to fifth. Weights Sunday, June 26. Starters to be named through the entry box by closing time of entries. Hollywood Park reserves the right not to divide this race. Should this race not be divided and the number of entries exceed the starting gate capacity, high weights on the scale will be preferred. Total earnings in 1984 will be used in determining the order of preference of the horses assigned equal weight on the scale. All fees for entries that fail to draw into this race will be cancelled. Trophies will be presented to the winning owner, trainer and jockey. Closed Wednesday, June 22 with 16 nominations.

Value of Race: \$163,500 Winner \$35,100; second \$30,000; third \$22,500; fourth \$11,250; fifth \$3,750. Mutuel Pool \$453,366.08 Exacta Pool \$443,239.00 Quinella Pool \$65,435.00

B. B. (Apr), by Religiously-Brooch, by Halo. Trainer Jory Ian P D. Bred by Plummer S David (Utah).

R FRIAR TUCK settled just off the pace outside PRESS BARON on the backstretch, moved up four wide on the second turn to gain the lead in upper stretch and held sway under left handed urging. POLLOCK'S LUCK set or forced the pace inside LITTLE LITE BUD to the stretch and continued on gamely along the rail through the drive. WILD INVADER was unhurried off the rail to the second turn, came wide into the stretch and finished well. ARGOLID stumbled slightly and ducked out at the start, prompted the pace outside the dueling leaders to the second turn, entered the stretch between rivals and weakened. TIMBALIER checked behind ARGOLID at the start, raced a bit off the rail on the backstretch, was sent between rivals leaving the backstretch, remained between foes on the turn, swung out for the drive and had only a mild late bid. SCENIC ROUTE saved ground early, went around PRESS BARON into the stretch and lacked the needed rally. PRESS BARON saved ground and gave way. LITTLE LITE BUD duelled outside POLLOCK'S LUCK to the stretch and had nothing left.

Owners--1, Plummer S David; 2, Lucky Me Stable; 3, Juddmonte Farms; 4, Pegram Mike; 5, Lord & Lady White; 6, Lewis Debi & Lee; 7, Juddmonte Farms; 8, Skinner Roger H.

Overweight: Wild Invader (4), Timbalier (3), Scenic Route (3), Press Baron (1).

\$3 Triple (6-8/9/10-7) Paid \$4,406.40; Triple Pool \$138,013.

I firmly believe that the capabilities of the Sartin programs give us the luxury of being able to use them in a stand-alone manner or in conjunction with each other. Keep in mind that you can print your readouts and compare two or more programs or you can utilize the DOSSHELL feature on your computers to run multiple programs.

While I am still very new at using QUAD-RATER, I already have seen what it can do and look forward to more success each 20 race cycle. Thank you, DOC!

Picking two horses to make the board in a 25-horse field is a challenge, and should be rewarded handsomely. Picking two horses to make the board in a six-horse field is a waste of time. ♦

LORD KNOWS I DON'T NEED ANY MORE ENEMIES AMONG THE MAINSTREAM EXPERTS. I HAVE ENOUGH OF THOSE FOR ONE LIFETIME. MR. ANTONUCCI IS A HIGHLY RESPECTED WEST COAST HANDICAPPING EXPERT/JOURNALIST AND A SPECIALIST IN THE FIELD OF TRIP HANDICAPPING. HOWEVER, THIS STATEMENT IN AMERICAN TURF MONTHLY PIQUED OUR CURIOSITY, SO I HAD SHANE HANDICAP EVERY 5, 6 AND 7 HORSE FIELD FOR A MONTH AT HOLLYWOOD PARK, ANTONUCCI'S TRACK, AND LO AND BEHOLD WE CAME UP WITH WELL OVER A DOZEN RACES THAT PRODUCED DOUBLE DIGIT MUTUELS USING QUAD-RATER AND CONFIRMED THROUGH SYNERGETIC MATCH UP II OR THOROMATION. HERE ARE JUST A COUPLE:

SHANE SARTIN

USING EVERY HORSE IN RACE. BEST SPEED RATING. LAST THREE:

YOU'VE ASKED FOR IT...AND YOU'VE BEEN TOLD IT ISN'T AVAILABLE.

WELL, YOU WIN! - HERE IT IS - AT LEAST MOST OF IT.

WHAT IS IT?

A SARTIN METHODOLOGY PRICE LIST

**MOST OF THE FOLLOWING ARE FOR SARTIN CLIENTS ONLY!
WHEN AVAILABLE FOR NON-CLIENTS, IT IS NOTED.**

Unless stated otherwise, all computer programs are available on IBM/compatible format ONLY!

If ordering be sure to state 3.5 or 5.25 disk size. Calif. residents add 7.75% sales tax

Thoromation MUST BE APPROVED and CONTRACT SIGNED before shipping.

THE FOLLOW-UP - The bi-monthly journal of the Sartin Method

Now mandatory for all clients! Per year subscription:

\$72 bulk mail /1ST CLASS and Canadian \$87/ Other foreign mail \$100

Available Back issues of the Follow Up @ \$12.50 each.

SARTIN VIDEOS- 3 VIDEO PACKAGE WITH MANUALS

\$89.95

The six most important symposiums from Sartin Seminars

You may buy these videos individually - call or write for price/subject

SARTIN AUDIOS - 13 TAPES WITH MANUALS

\$99.99

The entire Las Vegas Spring '93 Seminar with cassette album

Available as set only.

SARTIN MANUALS

THE PACE LINE - with 6 Audio Tapes

\$55.00

AVAILABLE TO NON-CLIENTS

Our initial effort in solving the problem. 140 pages covers every aspect of pace and contender selection.

As our computer programs become more sophisticated, contender and pace line selection is the last great stumbling block left on the road to financial independence. This incredible manual comes with eight hours of audio tapes.

THE BROHAMER MODEL - with 1 Audio Tape

\$44.00

AVAILABLE TO NON-CLIENTS

More than just a guide on how to keep a "Brohamer Model", this book also guides you through using the model to handicap several races with one of America's top handicappers. Each step in the entire model making and handicapping process is carefully presented. Not only what to do, but why. Very highly recommended for beginners and experienced users alike. Includes a set of audio tapes answering questions. AVAILABLE TO NON-CLIENTS

BROHAMER LECTURE SERIES

\$99.00

Manual and 14 Audio tapes. AVAILABLE TO NON-CLIENTS

WINNING PACKAGE

\$99.00

3 manuals and 7 audio tapes. AVAILABLE TO NON-CLIENTS

THE MATCH UP

\$35.00

Manual by Jim Bradshaw and Dr. Sartin

This gets to the very heart of the Methodology; the concept used to describe how a horse will respond to the pace of today's race. An absolute must for those who have mastered the basics of the Sartin Methodology.

EXACTA/QUINELLA PROFITS -THE 55% SOLUTION

\$32.00

Most people are surprised to learn that the second best horse is not the likely place horse. This book is a series of articles written by Dr. Sartin together with more than a dozen of the best players in PIRCO on various aspects of place horse handicapping. Recommended for advanced users ONLY.

THE TANDEM RACE: HOW TO SPOT IT-HOW TO WIN IT

\$29.00

Dr. Sartin's elegant, counter-intuitive handicapping procedure that can give you the insight to win those "unwinnable" races. After months of study of his own and other PIRCO members losing races, Doc developed this whole new insight into handling horses coming from the same race and facing each other again today. A must for the intermediate and

INTRODUCTION TO WIN THERAPY

\$25.00

Dr. Sartin's presentation paper for the 7th International Conference on Gambling and Risk Taking at the Univ. NV, Reno.

PSYCHOLOGY OF WINNING

\$18.00

Dr. Sartin's celebrated treatise on the subject that is 80% of winning

ADJUSTMENTS MANUAL

\$14.00

ALL SEMINAR WORKBOOKS ARE \$25 - SUBJECT TO AVAILABILITY

SARTIN COMPUTER PROGRAMS:

PHASE III

\$60.00

SYNERGISM II

\$189.00

SYNERGETIC MATCH UP II

\$275.00

Our most popular program - filled with graphs, Stop Action Horse Screens, Sartin Pace Numbers and Odds Line. Often called the bargain basement Thoromation.

NEW MODERN PACE HANDICAPPING SOFTWARE PROGRAM

\$279.00

For IBM/Compatible only. Avail for 3.5 HD, 3.5 DD and 5.25 HD only. AVAILABLE TO NON-CLIENTS

MONEY MANAGEMENT

\$30.00

Available for the Sharp 1261/62 and Sharp 1350/60 & IBM/compatible only.

ENGEN - VELOCITY

\$49.00

A vast improvement on Pargenerator Plus. A multiple use program for making a complete track profile with secondary benefits showing you how to pick a representative pace line by class, distance and surface.

PARMAKER

\$22.00

Q-SCAN - The basic program for quarter horse racing w/manual

\$99.00

Q-MATION

\$199.00

Quarter Horse Handicapping Program. Comes with manual.

Also will make pace of horse par times for greater accuracy.

ULTRA SCAN PLUS

\$199.00

Computer program, Manual, and Audio Tapes - Ultra Scan is Dr. Sartin's truly unique approach to handicapping. It is available only to those clients who have demonstrated their mastery of Phase III. Not a program to be rushed into, it may take a few months to adjust your thinking to this novel handicapping program. Not for beginners.

ENTROPY II - with graphs, summary & odds line

\$149.00

To upgrade from original ENTROPY - \$ 69.00

send in old disk after receipt of upgrade

XTOR - Download up to 10 tracks to your 4 call Sartin Program

\$95.00

THOROMATION - requires contract and good understanding of Sartin concepts

\$595.00

and an OK from Dr. Sartin (set up a phone appt. or talk to him at a seminar/workshop

To upgrade from early EXDC program - \$69 for 6 horse field / \$89 for 12 horse field

send in old disk after receipt of upgrade

NEW!

QUAD-RATER pace of race/pace of horse and exclusive Long Shot Detector

\$175.00

IBM/compatible only

All prices are subject to change.

FRACTALS

REPORT

After hearing Troy Panzarini's brilliantly executed Fractals presentation at the June Beaumont Workshop, many testers who had been at best, luke-warm or confused in their previous responses, got on the ball and started sending in their reports. Here is the latest, dated July 11, 1994:

Troy's presentation is on video and audio tape that will be released when Fractals is perfected.
Question is, with reports like this, how much better can it get?

IF TROY PANZARINI'S MOTHER'S NAME WERE HELEN...HE'D BE TROY OF HELEN

While Mark Cramer generously acknowledges that I was first to advance the importance of the Psychology of Winning, he has always referred to it in his own writings. After Mark, Dick Mitchell became the first serious handicapping author/convert to address the importance of psychological factors - espousing them ever since we were on the road together in 1986.

The Cramer-Olmsted Report

Volume 3, Number 10

August, 1994

Editorial BY MARK CRAMER

Betting Psychology

It's time for Saratoga and Del Mar. This year there is a proliferation of excellent publications on that meet, including those done by John Angelo and Joe Takach, two names that are familiar to C&O readers. Without underestimating the peculiarities of those two meets, it seems that the same players who win at other tracks are likely to emerge winners at the nation's premier summer meets. Those who have not yet found a way to win will not usually change their ways simply because they know the inner workings of a particular track.

It is the inner workings of the players themselves that count. C&O got out of the gate with the notion

that betting psychology, more than handicapping, is the great differentiator in this competitive pursuit. My colleague Dr. Howard Sartin eloquently reaffirmed this point when he opened his June seminar in Baltimore. He was the first public figure to advance the notion.

[Strangely (to me), handicapping books continue to bypass this fundamental issue.]

I'm convinced that betting attitudes coming from within the player are so vital to success (or failure) that I'm dedicating my own writing horse-player psychology. I feel that fiction is an excellent medium to accomplish this objective since it is all about human behavior, touching inner psychological mechanisms in a

way that "how-to" writing cannot do.

Even history pros use works of fiction in order to capture the essence of a period of time, while apparently objective narratives can't do this. So it is with one's betting history.

This month's feature, "Conversation With My Gambling Coach," while not technically fiction, uses a device of fiction, the dialogue, in order to bring home some truths about the psychology of horse betting.

Howard G. Sartin, Ph.D

The Psychology of Winning

Positivity

Winning through Meditative Visualization

We have previously discussed various personality types and their response to the anxieties imposed by having to make handicapping decisions. By now you should be aware of an almost universal phenomenon demonstrated, at one time or another, by virtually all clients over the past 20 years.

In the comfort and security of their homes, they are able to pick an abundance of winners, many at high odds, when handicapping *before* the fact, on paper, in a secure, home-like environment; but then fail to implement their decisions when influenced by the ambiance of the track or off-track wagering center.

This has been confirmed by attendees at numerous seminars from coast to coast and in Canada. Out of every one hundred clients there are usually no more than one or two who did not experience this problem until receiving the kind of therapeutic intervention I'll detail in this article.

In private consultation most clients invariably reveal personal problems not directly related to handicapping as the chief reason for winning "on paper" but failing at the track or off-site wagering center. We all can be categorized, however loosely, through psychological typology. In taking the various tests published in this column many of you have told me that you have identified yourself as having tendencies toward being Hypomaniac, Schizoid, Depressive, Obsessive-compulsive, or Masochistic. I stress the term *tendencies*. We are using these terms at the sub-clinical level. I have repeatedly emphasized that such classifications do not suggest morbidity or psychopathology in any way. Thus far only three individuals have taken my observations as a personal slap in the face. The rest of you have correctly perceived my motivation as an attempt to help you in overcoming the true etiology of *non-winning*. The word *loser* should never be used by anyone in THIS group. The very use of the word verbalized, even internally, sends *negative* neural-transmitters to all of our functioning organs, especially the brain, causing *negativity* to become a synaptic, reflex action habit pattern.

As frequently described by me in this column, *visualization* has proven to be a highly effective cure for the near-universal anxieties that inhibit proper decision making at the betting window. Visualization is used in two separate ways. A two-pronged attack force in the pari-mutuel war. Let's examine both.

The first application was succinctly described by one of my first six truck driver clients convicted of a gambling related felony back in 1975. I will call him Sam. He was the most successful member of my original group. "You know, Doc," Sam confided, "It's gettin' so after I been using these figures so long, I can almost see how the race is gonna come out even without writing down the numbers." He is the prototype of Jim Bradshaw. He was voicing a fact that through the years has been quite accurate.

By translating fractional times into rates of velocity, the user begins subconsciously to see the unfolding of a race. Knowing what to look for, the match up of contenders at each call becomes more apparent. As a result, the winner, and often the place (except in Jim Bradshaw's case) and show horse seem to loom up from the page of the Racing Form (or Past Performance Plus read-outs) as obvious choices.

This will happen most often with the more formfull horses, but astute methodologists can frequently detect long shots as well – *especially* when following the Long Shot Detector Guidelines described in another section of this issue.

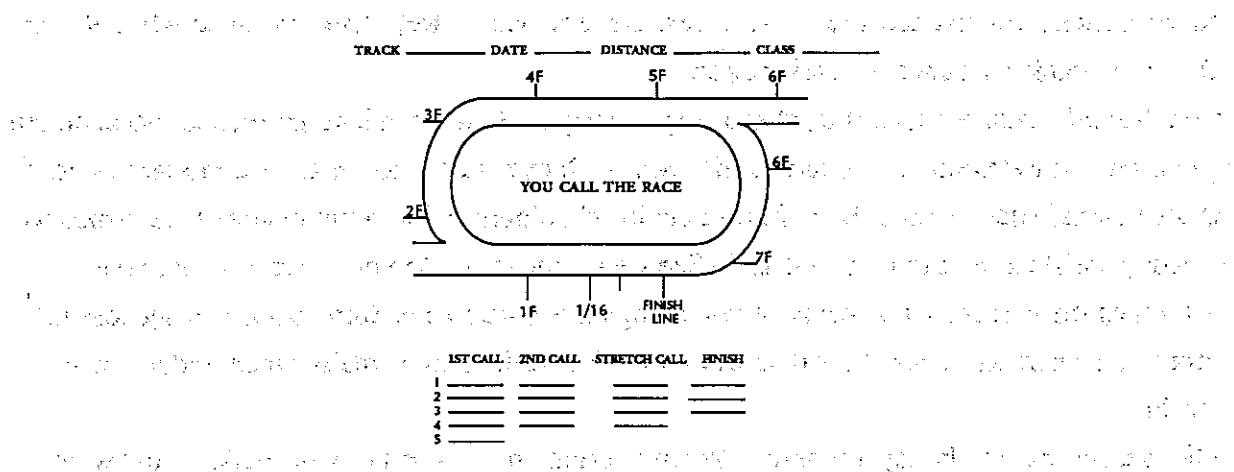

As a result of Sam's observation I devised the test you know as:

YOU CALL THE RACE

While many can successfully apply this exercise under my personal clinical supervision with superior results, fewer demonstrate the ability in practice. The underlying reason is a lack of confidence in their own judgment. This is another aspect of individual feelings of low self-esteem and indecision *not* obviously apparent in their job or profession but in handicapping only. Clients who have no trouble in making excellent vocational or professional decisions become, to use their phrase, unglued when faced with wagering decisions. I frequently observe doctors who can perform delicate surgery or complex medical treatment with uncanny precision, break out in a cold sweat and begin to inwardly tremble when asked to make racing decisions. Lawyers who easily handle million dollar cases and can argue brilliantly in court, routinely suffer stage-fright on the way to the betting window.

The same person who can look at a problem race requiring no real wagering decision and saying, "Ray Charles could find the winner in this race," often becomes blinded by anxiety in a real life situation. In running statistics derived from clinical control groups, twelve percent experienced mental blocks when faced with taking the YOU CALL THE RACE exercise. Their minds simply went blank and refused to respond. Of the remaining eighty-eight percent, a total of seventy-nine percent pick the winner in their final top two choices with one or more of the in-the-money finishers in their top four.

We have revised the format of the YOU CALL THE RACE exercise to include a graphic of a race track to further enhance the visualization process. Utilizing this innovation we find that client success has improved eight percent over results from the old exercise where no picture of a

race track was used. I urge you to photocopy copies of this picture (we have provided you with 2 full page YOU CALL THE RACE forms at the end of this article) and perform the exercise regularly until the more obvious Match Up becomes second nature to you.

Less obvious Match-Up's, the ones that produce the longer priced horses are more difficult to find with this process. This is why we created the **QUAD-RATER** with an almost rule-bound selection process.

Unlike handicapping itself, this exercise is performed under precise rules. Five minutes is allowed for the subjects to peruse the past performance charts, making necessary notes. Next, we ask you to begin calling the race to yourself, writing down you observations at each race call. As I told Sam, just imagine yourself as being the track announcer calling the race:

"_____ takes the lead, followed by _____ and _____ with _____ moving up into contention. Into the turn, it's _____ taking command, with _____ just behind, followed by _____. Into the stretch, it's _____ moving to the lead, with _____ making a bid, followed by _____, and _____. At the wire it's _____ 1st, _____ 2nd, and _____ 3rd."

Here you must visualize the three in-the-money finishers. By this time most have reduced the race to only three, at the most, five possible win-place-show contenders.

Sam was a master of this art. One day at Del Mar, I watched him put it into practice while standing in the midst of a crowd of railbirds. In his hand was a clipboard with a tablet on which he had written his You Call The Race analysis. The race began and, without EVER looking at the horses running along the track itself, Sam began announcing aloud, oblivious of the crowd around him:

"_____ takes the lead, Sam began, imitating the track announcer's style. "Followed by _____ with _____ making a bid on the outside." Sam's projections were right on the money. "Into the turn, it's _____ taking command, with _____ just behind, followed by _____. Dow-own the stretch, it's _____ taking a commanding lead, with _____ moving up fast on the outside. It's a real duel now, _____, and _____ just heads apart! And at the finish, it's _____ and _____. At the wire, _____ wins by a neck with _____ second and _____ comin' in third."

At the finish, Sam had accurately pre-called the race win, place, show, followed AFTER Sam's calls by the track announcer's confirmation.

One railbird, witnessing all this, stared suspiciously at Sam, for a long perplexed moment. His expression was incredulous. He turned his head, with eyes raised to the track announcer's booth and then glared back again at Sam. Shrugging his shoulders and looking resigned, he turned to his buddy standing next to him, and said "See what I mean. I told you the races were fixed!"

Why then the paradox of so many of you being able to duplicate Sam's ability to successfully perform this exercise under clinical supervision while failing so dismally when under fire at trackside?

The reasons are purely psychological. When queried, those who fail will reply, "I just went completely to pieces inside. I was like jelly. My eyes blurred. I just couldn't see things the way I could in your office."

While paradoxical this is highly predictable. When we're confronted with uncertainty we reach back to our earliest, primal childhood conditioning for assurance and support. Coping mechanisms are founded in our first two years of adapting to the natural insecurities of infancy. All ventures involving risk create fear. All fear is symbolic of man's basic and ultimate fear of death. Whether that fear is centered on loss of life or just losing the fifth race, is immaterial. The same unconscious, inner forces are at work.

Insecurity evolves from inadequate nurturing during the formative stages of development. Rare is the individual who has not, in some manner, experienced this. Successful people most often overcome it through a process called *over compensation*. Normal people compensate normally. Inordinate persons, history's great achievers, are/were/ virtually *all over-compensators*.

Not winning at the races is completely *normal*. It is common to ninety-five percent of those trying. Thus, the successful handicapper is, by statistical definition, a great achiever.

Being able to nominally win races on paper, in the security of the home, or in the therapeutic setting of a clinical office or classroom, is commonplace. Since no risk is involved, individuals will function from adult, logical reasoning with logical result. The ambiance of a racetrack or off-track betting site, instills instant anxiety. Many persons refuse to accept this conclusion. They claim that they feel just as "at home" at the track as in their living room. Supported by the extra adrenaline flow caused by crowds and anticipation, Fear Denial is natural, especially in males. Most do not consciously experience actual anxiety response until after a few losses or when the racing day ends. Even then, bolstered by fellow NON-winners and maybe a few beers, reaction may be further delayed until the NON-winner is in bed lying in darkness. Sleep won't come and a mental motion picture film begins to roll, reenacting the day.

The anxiety now becomes real; no longer denied. For many, this is a time of remorse. Whether immediate or delayed, anxiety response causes more race bettors to NOT WIN than lack of information or a valid handicapping method. Without the element of fear, the majority of you are able to achieve an adequate win proficiency through the "You Call The Race" visualization

exercise, also known as "Eyeball Scan". This requires no more information than that contained in the past performance charts of the Daily Racing Form or Past Performance Plus. To eliminate this debilitating undercurrent of anxiety, some drastic *self-evaluation* and personal reconditioning is in order.

NOT winning is a conditioned response. A habit. So is winning. But the NON-winning habit dominates because it is easier to acquire and more people are doing it. Mom, Dad, Aunt Martha and society have all contributed. "You can beat a race but you can't beat the races" is a myth made popular by the late Damon Runyon. Just the opposite is true. You can NEVER be sure of winning any SINGLE race. Too many unpredictable things can happen. Handicapping success comes through the consistent application of *positivity* to a valid, flexible procedure.

Success is based on volume, not isolated races. "All horseplayers die broke" is another socially supported myth and is often recited by fundamentalist preachers. This becomes a self-fulfilling prophecy only to all those who subconsciously acknowledge it.

The theme "In the long run, all gamblers lose" recurs throughout recorded history. Variations of it appear in the written and spoken lore of virtually every culture. With so much documented support, it would be folly to deny its essential truth, except by those with exceptional talent.

The real question becomes: Does the art and science of profitably predicting the outcome of a series of thoroughbred races constitute *gambling*? A wealth of evidence, both statistical and empirical says NO! It is NOT gambling, except as life itself is a gamble. However, if in your heart, you believe it is gambling you will surely fulfill the prophecy that "all gamblers lose".

The only winning "horseplayer" I know who steadfastly refers to himself as a gambler, is Andy Beyer. In light of his success, this stance may well be just a pose to support his flamboyant public image. In his own mind, I feel certain that he has reconciled the odds against him to a manageable number. Hence, his proclamations to the contrary, he is NOT gambling, per se.

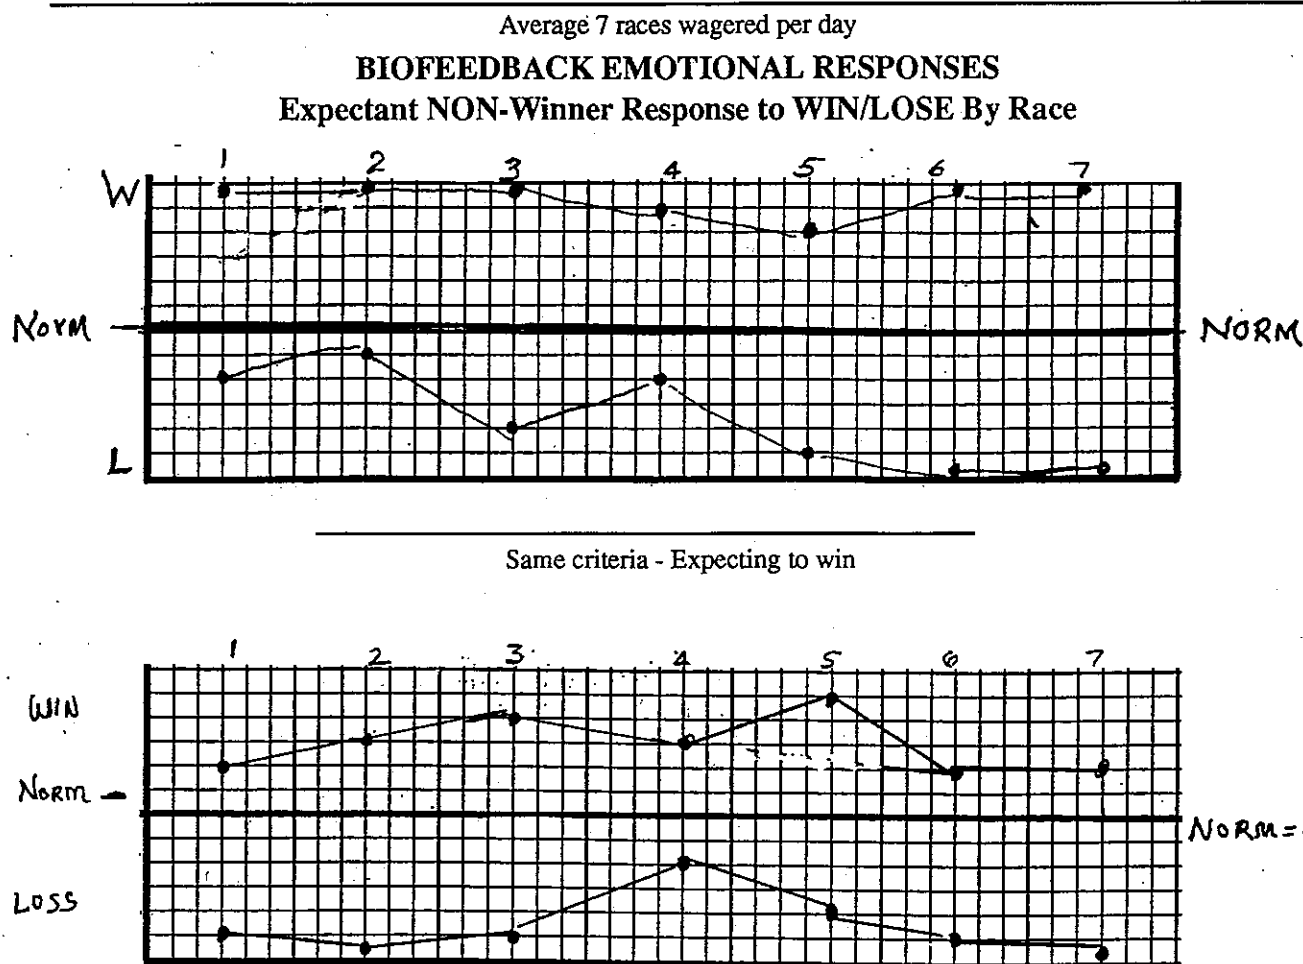

It is incumbent upon *all* handicappers to similarly know the odds and to reconcile themselves to overcoming them. Surveying the general public, this is being done by only five percent of those attempting it. On a consistent basis, which is what we seek, a mere two percent take home most of the profits from handicapping. This statistic discourages some - especially those with low self-esteem. They cannot visualize themselves being in a minority of two percent.

We know that almost eighty percent of our clients are winning, or at least NOT losing by the *selection process* attained through use of our advanced computer programs. Unfortunately, only thirty-five percent of them are consistently successful in making money through appropriate wagering at the moment of truth, *profiting* optimally from their winning picks. Joining this elite group requires a drastic change in habit patterns. The habit of non-winning must be transposed into the habit of winning! Since not winning and winning are two sides of the same coin, the transformation is less difficult than most imagine.

Consider this scenario: The average NON-winning "horseplayer", though overtly denying it, goes to the track fully expecting NOT to win, or at best, to break even for the day. Optimists might even perceive the possibility of a big score from winning a given race or exotic. However,

the unconscious anticipation is losing or breaking even. Now, when a win does occur, how does this individual respond? With aggravated *emotion!* Rejoicing, sometimes to a state of near delirium, follows.

On the other hand, a handicapper, as typified by our clients, who *expects* to WIN, will suffer the same emotions after a LOSS. Attach both to biofeedback equipment, comparable to a polygraph, and you will see a graph that looks like this:

The electrical impulses registered on the graphs are almost identical equal opposites: win, NON-win. The originals of these graphs and the one in Fig. 10, were made by a portable biofeedback unit with printer attached to a client's person for two consecutive racing days. The extreme emotional swings indicate the kind of instability that characterizes the NON-winning "horseplayer". They create dissociation, ephemeral perception, blurred vision and the kind of altered cognizance so often reported by NON-winners.

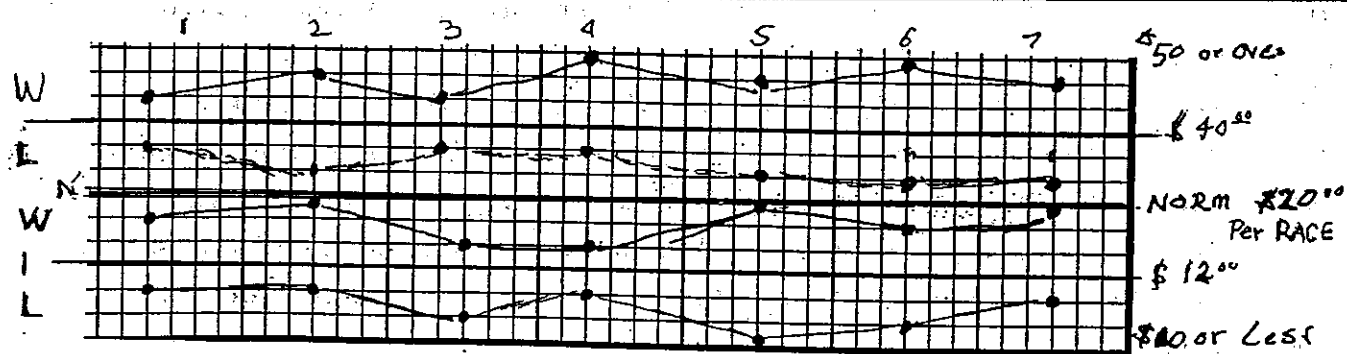

Consistent, profitable handicapping can be achieved only through control over such instability. The mind must be sharp enough to concentrate on matters requiring clear and immediate deci-

sions. You may now be saying to yourself that you do not experience any of these symptoms because you only bet small amounts; that your financial risk is minimal. In your mind, as in the minds of others with similar beliefs, this protection device leaves you immune to the consequences I've been describing.

True, so-called recreational handicappers, who risk only two or three dollar bets, DO suffer from less *overt* emotional debilitation. They cannot make any profit, either. If profit is the goal, this creates frustration, which is also emotionally damaging.

Ironically, biofeedback registrations taken from large and small bettors are virtually the same when recording wins and losses. While financial considerations differ, the EGO investment made by each is identical. Financial loss is relative. The harm resulting from EGO loss is measured by individual differences in self-esteem. Therefore it is quite dangerous and destructive to rationalize that because you may bet small you are free from negative consequences.

With biofeedback training and visualization, my original truck driver clients, under identical race track conditions, produced this graph:

Visualization therapy and biofeedback training, along with Win Therapy, under personal supervision or self-administered, have been instrumental in turning many NON-winners into consistent winners. Ironically, their pre-race prediction abilities were not substantially and *positively* altered. Like most persons using a viable prediction method, they could pick winners. The problem lay in their *decision* process - in crystallizing their final choices and making proper wagers. I should note here that when I retired from active practice, I sold my biofeedback equipment, so now we only have Win Therapy, success with which requires desire, focus and the *true will* to succeed.

Benefits from visualization therapy can be realized without clinical supervision if an individual is willing to follow a prescription. First, and most important, a *need* for change must be recognized. Most persons who regrettably refer to themselves as "horseplayers", and sadly, some of you will stop reading abruptly right here, refusing to accept the fact that the psychological implications I'm discussing apply. They cling to the false notion that "just a little more *information*" will solve their problems. They will buy "how to" books, systems, audio-video instruction and go to breakfasts held by trackside touts giving three selections per race with *no* sound analysis (unlike the very sound analysis given by Brohamer, et al, sessions scheduled for Del Mar), rather than admit to themselves that they lack not information but *inspiration*.

Attitude, mind-set, psychological protocol, call it what you want – these are the ingredients comprising at least seventy-five percent of non-winner's problems. I expect most "horseplayers" to disagree with my contentions. Some (with newsletters of their own) more vehemently than others. I do not disdain this attitude. NON-winners and experts with fixed, archaic notions put the money through the mutuels that provide winners with their profits. NON-winners, lots of them, are essential to the few who win.

As the song goes, "Here's to the losers, bless 'em all".

The *first step* in Visualization Therapy is doing the YOU CALL THE RACE exercise for every race you handicap. Do it until it becomes as natural to you as opening up the Racing Form. Make it a habit. When actual finishes start concurring with your calls, it will be a *winning habit*. Then proceed with QUAD-RATER to add the Long Shot Potentials. One day you may also be able to spot them through visualization.

Each winning habit you adopt will serve to over-ride a NON-winning habit. At some point you will have obliterated all of those bad habits, substituting *winning habits*. Winning and NON-winning are not cosmic entities. They result directly from conditioning. Habits are ingrained through repetition.

The *second aspect* of Visualization Therapy is best achieved in a meditative state. Once I erroneously referred to this as "transcendental". True Transcendental Meditation requires special training. In such a state, visualization is impossible because the subject transcends cognizant thought processes. This is the kind of meditation, TM, practiced by followers of the Maharishi Mahesh Yogi and seldom stimulates material success because Zen and Yen (as in *a yen* for profit) do not often go together.

The kind of meditation I practice and prescribe for you, involves putting yourself into a hypnagogic state, like one you experience between sleep and waking: The arena of dreams where self-hypnosis can be performed. Many books are available on the subject. Commercially produced audio tapes for use with stereo earphones, provide both instruction and appropriate background sounds.

Such sounds must NOT be soft, evenly-metered or rhythmic conventional music associated with relaxation. While western doctors have prescribed meditation for relaxation and sleep, this is not its true purpose. Eastern practitioners, the originators, say the meditation is not for inducing sleep, but rather *heightened awareness*. Not the kind of Beta Wave awareness we should experience when driving crowded freeways or faced with emergency, but awareness associated with creation, discovery and bliss. Meditation activates Alpha and Theta brain waves, enhancing your right brain activity - promoting your intuitive powers. Achieving this state usually comes from lying prone on your back, arms at side, palms open, feet slightly apart.

Inhale deeply through the nose, exhale. Breathe in, breathe out, rhythmically. Let your mind experience your body, sensing each individual part, from toes to top of the head, and back again. Now, breath *in* through the right nostril, then breath out through the left. When you actually feel the slight sting from the designated input-output of breath, you will know that you have gained a measure of control over your body.

You will have then broken your first habit. In this hypnagogic state you will now visualize the *new you* starring in a mental movie which you will also direct. The scenario begins as YOU arrive at the track, or off-site betting establishment. You are fully composed and not harried and remain so throughout the day.

Now focus your camera on yourself as you peruse the form, choosing predictive running lines, isolating the true contenders, making appropriate notes, calculating your figures. Now move your camera in for a tight shot of the Racing Form Past Performances. See the match up of the race. Pull the camera back. Show yourself making clear decisions, delineating your selections with calm logic. Now you're going to the betting window, decisively ordering tickets on your logical choices. Walking away from the window, supremely confident. Now direct your mental camera to a panorama shot of the race track. The horses in the gate, the flag is up. They're off. Zoom in for a shot of the horses you bet on. Watch the race unfold to the turn, round the turn, into the stretch and to the wire. You WIN! Now your camera view tightens to a single shot of YOU, the STAR, strolling relaxed, but with head high, to collect from the paying teller. *See and feel* it, bulky and green.

After viewing your movie a few times write a note to yourself detailing all of your present foibles. Then include scenes in your movie where you overcome them. As any problems are encountered, add scenes of you *solving* them. You will not consciously deal with the problem while in a meditative state. Your screenplay will provide answers. Play the movie over and over again until it becomes, in daily life, *your personal reality*. Doing this will NOT be a fantasy or a day dream *if* you have first learned the concepts of your viable, objective and flexible handicapping method. Please note that I stress CONCEPTS over mechanical procedure. Many therapists, such as Dr. Dennis Waitley and others, recommend that you also post written messages of *positive reinforcement* around your house where you'll constantly see them. Charles Atlas made a fortune selling photographic blow-ups of the muscles his customers most wanted to develop. Lock yourself for several hours a day in a room full of pictures of bulging biceps and, research shows, you'll end up with bigger biceps yourself.

In the early stages of Visualization Therapy, you can expect to experience times at the track or off-track wagering center, when your equanimity and composure once again begin to desert you. The old anxieties and confusions return to haunt you. When this occurs it's because a new habit pattern has not fully superseded the old. If it happens to you, don't panic and begin to think that you're incurable. Find yourself a place away from the crowd, by a post, a wall or in a rest room stall. Relax, close your eyes and turn on your internal motion picture projector. Rerun your personal movie and apply the rubber band technique as described in several previous Follow Up issues..

To be effective, these visualization techniques should be practiced regularly. I still run my own winning film almost nightly after twenty years. They must also be taken *seriously*. Halfhearted, short-lived attempts will not be rewarded. Nor will skepticism. Those who do not believe in themselves may find it difficult to trust in a Photoplay of their own creation. In the initial stages, a good measure of faith is required.

At this moment I can visualize some character out of Damon Runyon or William Murray reading this. I see him eyeing me with amusement and suspicion, mixed with the fear that at any moment I will turn violent and begin frothing at the mouth. He will surely flee in panic should I recite to him from Shakespeare -

"There are things in Heaven and Earth, Horatio, that aren't even dreamt of in your philosophy".

Alas, there *are* such things. Visualization Therapy is one of them. I was once a NON-winner, too. I wagered defensively. Restrained by anxiety from making bets of sufficient size to make me any real money. I was more concerned with NOT losing than gaining a substantial profit. Then I began to seriously practice meditative visualization. It worked for me. It has worked for innumerable others.

Beyond handicapping, such techniques are used by Ayurvedic Mind-Body healers and even by some western medical doctors. Documented cures of inoperable cancers and other organic disorders would suggest that our Runyon/Murray race track character should not have run away. Had he stayed he might even, some day soon, be equipped to provide an accurate answer to the eternal question..."Whodoya like?"

P.S. I have used the word "logic" several times in this piece. I do *not* mean conventional logic, but the kind derived from believing in the Logic of "The Handicapping Revolution".

TO DUTCH OR NOT TO DUTCH

D. BARRIOS

There seems to be a general misunderstanding regarding the relative effects of splitting bets in different ways. I would like to clarify this by making some comparisons. But the point I would like to make here is that, apart from betting two picks independently according to their respective advantages, the way a bet is split doesn't make much of a difference overall.

The reason for that is that the constantly changing combination of odds for each successive bet requires a constantly changing bet split percentage to be optimum. If the player chooses to use a fixed percentage such as 60/40 then his bet will be optimum only a small percentage of the time.

The optimal way to split a bet is dependent on the odds involved and the percentage of time the players first pick wins in relation to his second pick. No fixed bet ratio can be correct for all possible combinations while dutching strikes a broad average with the positive effect of minimizing the variance. So one can't simply say that one way or another is always best. Let me run this down mathematically.

Let's say that our top two picks result in average odds of 3/1 and 4/1. This results in a typical \$9.00 average mutual. Consider a \$30 bet split 60/40, 50/50 and 55/45 (probability dutch) with each of the player's first pick winning 50 % of the time.

<u>60/40</u>	<u>50/50</u>	<u>55/45</u>
\$30 x .60 = \$18	\$30 X .50 = \$15	\$30 X .555 = \$16.65
\$30 x .40 = \$12	\$30 x .50 = \$15	\$30 x .445 = \$13.35
60/40: $\frac{(3 \times \$18) - \$12}{\$30} = 1.4 \times .50 = .70$		
$\frac{(4 \times \$12) - \$18}{\$30} = 1.0 \times .50 = .50$		
Yield = .70 + .50 = 1.20 = <u>\$8.80</u>		

$$50/50: \frac{(3 \times \$15) - \$15}{\$30} = 1.0 \times .50 = .50$$

$$\frac{(4 \times \$15) - \$15}{\$30} = 1.5 \times .50 = .75$$

$$\text{Yield} = .50 + .75 = 1.25 = \underline{\$9.00}$$

$$55/45: \frac{(3 \times \$16.65) - \$13.35}{\$30} = 1.22 \times .50 = .61$$

$$\frac{(4 \times \$13.35) - \$16.65}{\$30} = 1.22 \times .50 = .61$$

$$\text{Yield} = .61 + .61 = 1.22 = \underline{\$8.88}$$

50/50, in this typical situation yields the highest return.
60/40 the lowest and the dutch the middle.

Since most player's first pick will win more often than their second pick let's see what happens when we change the percentage of time the player's first pick wins from 50 % to a more realistic 56 %.

$$\begin{aligned} 60/40: & 1.4 \times .56 = .784 \\ & 1.0 \times .44 = .440 \\ \text{Yield} & = .784 + .44 = 1.224 = \underline{\$8.90} \end{aligned}$$

$$\begin{aligned} 50/50: & 1.0 \times .56 = .56 \\ & 1.5 \times .44 = .66 \\ \text{Yield} & = .56 + .66 = 1.22 = \underline{\$8.88} \end{aligned}$$

$$\begin{aligned} 55/45 & 1.22 \times .56 = .683 \\ & 1.22 \times .44 = .537 \\ \text{Yield} & = .683 + .537 = 1.22 = \underline{\$8.88} \end{aligned}$$

In this case 60/40 barely yields the highest return, 50/50 and the dutch tie for second.

Now let's change the parameters to include higher mutuels - say odds of 5/1 and 8/1 and have our first pick win even more often, say 62 %.

$$60/40: \frac{(5 \times \$18) - \$12}{\$30} = 2.6 \times .62 = 1.612$$

$$\frac{(8 \times \$12) - \$18}{\$30} = 2.6 \times .38 = .988$$

$$\text{Yield} = 1.612 + .988 = 2.60 = \underline{\$14.40}$$

$$50/50: \frac{(5 \times \$15) - \$15}{\$30} = 2.0 \times .62 = 1.24$$

$$\frac{(8 \times \$15) - \$15}{\$30} = 3.5 \times .38 = 1.33$$

$$\text{Yield} = 1.24 + 1.33 = 2.57 = \underline{\$14.28}$$

The probability dutch must be recalculated:

$$\begin{aligned} 5/1 &= .1666 & 8/1 &= .111 \\ .166/.277 &= .60 & .111/.277 &= .40 \end{aligned}$$

$$\begin{aligned} 60/40: & \frac{(5 \times \$18) - \$12.00}{\$30} = 2.60 \times .62 = 1.612 \\ (\text{Dutch}) & \end{aligned}$$

$$\frac{(8 \times \$12.00) - \$18.00}{\$30} = 2.60 \times .38 = .988$$

$$\text{Yield} = 1.612 + .988 = 2.60 = \underline{\$14.40}$$

Interestingly, in this case, dutching duplicates 60/40 - as it will in numerous other combinations and yields an equal average mutuel.

You can try any number of combinations and as these examples show 60/40 will occasionally yield the highest average, more often it will not. No fixed ratio can be correct for a large number of diverse situations.

The highest possible return is had by betting two picks independently in which case the percentage bet on each horse would change in every race. This, however, would require a paradigm change in the Methodology's betting approach.

A player could determine the best ratio for his play within the framework of our current approach by consulting his records, determining the average odds for 1st and 2nd picks and the percent of time his first pick wins in relation to his second and doing the above calculations.

However, the overriding point to be gained from this exercise is that the average difference from a fixed ratio split to a dutch in actual yield if one were to calculate hundreds of combinations is insignificant - less than + or - 8 % overall and most often less than + or - 4 %. This isn't where the money is!

Aside from striving to obtain the highest win rate and average mutuel that you can, the biggest difference comes from betting more when you have a greater advantage, less when you have a lesser advantage and nothing when you have a no advantage.

Handicapping by Time

of "Pittsburgh Phil" 1907

Quite a number of systematic handicappers take time as a basis for their calculations. I could never see where time was a positive criterion. Time enters into the argument under certain conditions, but if depended upon entirely for a deduction it will be found wanting. The atmospheric conditions will have much to do with the time of a race. The way a race is run will have much to do with the time of such race. I will give an illustration of this that is positive. The match race between Admiration and May Hempstead at Sheepshead Bay was run in 1.40 1-5.

Some days before the match race both fillies ran in two different races at a mile—Admiration carrying 111 lbs. and May Hempstead 107 lbs. Admiration ran in 1.41 and May Hempstead in 1.39 1-5. Making allowance for weight, those who handicapped the match race by time, might expect both horses to run under 1.40 when they met in their duel. What was the result? Admiration won the match race in 1.40 1-5, and May Hempstead was beaten by many lengths, yet she had covered the same course under almost identical conditions even as regards the atmosphere, in 1.39 1-5. The cause of this change in time was due entirely to the way the match race was run. It was the early pace that made the time slow, the first half mile being run in something less than 47 seconds, and it became a question of sheer gameness as to which mare would crack first. One of them had to wilt under the terrific pace, as is always the case in races where two or more horses are being driven to their limit of speed, in the early part of the race. No better illustration of the uncertainty of time as a basis for handicapping could be given than the Admiration and May Hempstead races.

Anatomy of a Problem Race

Guest Analyst:
DOC SARTIN

The majority of our Problem Races in the past have been from California tracks. The reason being that most of the people who volunteer these races LIVE in California. I don't like this any more than subscribers who live in the mid-west or eastern states. The way to change it is to get more of you NON-California clients to submit races!

I'll start the ball rolling with this 5th race from:

Chicago's Sportsman's Park
April 19, 1994

Sportsman's Park

5

1 MILE. (1:36) CLAIMING. Purse \$7,900. 4-year-olds and upward. Weight, 122 lbs. Non-winners of a race at one mile or over since March 19, allowed 3 lbs. Of such a race since February 19, 5 lbs. Claiming price \$6,250. (Claiming races for \$5,000 or less not considered.)

1 MILE

AT LAST! A race in which the winner does NOT finish first or second in Panel #3 of the Synergetic Match Up or Thoromation Stop Action screen. Unless you use the auto-project from one of those programs – then it finishes WAY OUT in front. But I used the Auto-Project from the new POR/POH QUAD-RATER PROGRAM just to make this race more fun.

MAK-	159.44	65.61	66.12	68.27	32.69	31.73	PRE
ALI	157.34	66.09	66.44	67.47	33.01	32.53	S/P

NOTE that I used the EXACT procedure for Contender/Pace Line selection as described in Follow Up's 41, 42 and 43. BEST of the last three at a comparable distance, Class & Surface. MAK-P had no route lines so I merely projected its LAST line to today's 8 furlong distance. NOTE also, that NO HORSE was taken from a line farther than 2 back. Four were taken from the last race.

THE GRAPHS: Confirming the FIRST SCREEN SHOWN:

1=Add/Edit 2=View 3=Scratch 4=Hide 5=Copy✓ 9=eXit

ALI does NOT qualify either in POWER or LONG SHOT rating but I felt that you'd be more comfortable with 5 horses than with only 4. (Although later I took out ALI - It did not show up on any readout) With contenders and pace lines selected and the race narrowed to 5 (or 4) horses, I merely return to the ENTRY SCREEN and press 3 to copy. Not knowing which of our 4 call programs you might be using, I copied to SYNERGETIC MATCH UP, KGEN & THOROMATION.

Here are the resultant readouts. First, KGEN. Note MAT-P's distinctive bulge about which I have written so often.

On the Kinetic Potential Screen, MAK-P leads in 7 of the 10 categories

And, for further confirmation, the PHASE I Composite Screen. Keep in mind that Sportsman's has been expanded, BUT to 7/8th of a mile, NOT to a mile as some of you have reported. The turns are still tight and MED% (or %Early as used on Phase I) shows MAK-P with both an EARLY advantage and the least DIFF of all contenders. The second least DIFF belongs to MYST and the RUN has the most DIFF (Counter Energy).

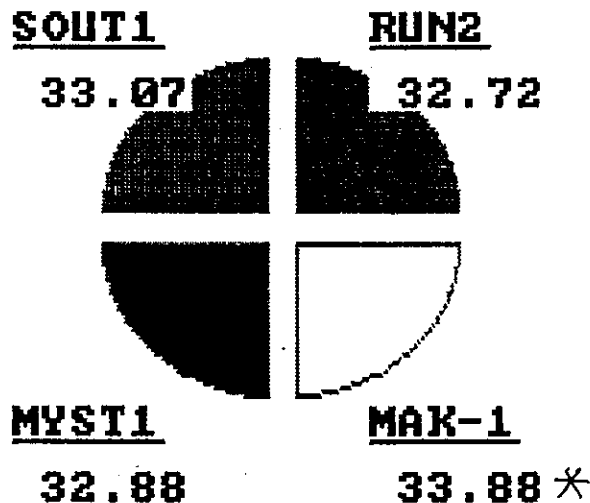

C O M P O S I T E R A T I N G S

Name	Mpr	Lpr	Cpr	%E	Diff
RUN2	73.0	92.0	165.0 3	44.24	-19.00
SOUT1	79.5	90.0	169.5 1	46.90	-10.50
MYST1	76.0	87.0	163.0 4	46.63	-11.00
MAK-1	81.5	85.3	166.8 2	48.85	- 3.85 x

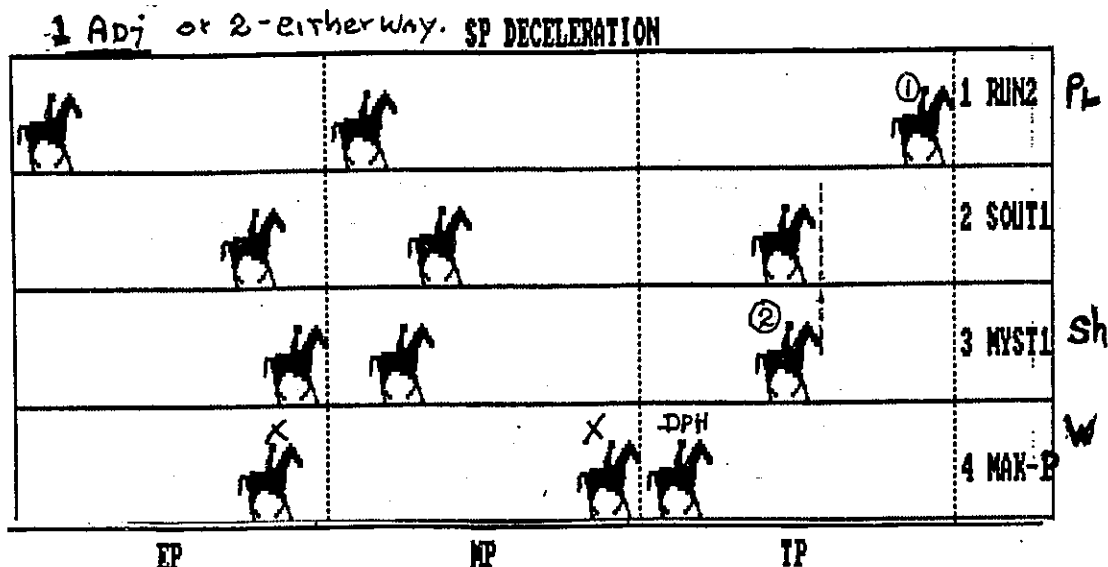

When you see the Result Chart it will remind you of the many times I've written that SHOW horses tend to run most like winners but with less Energy and that place horses are COUNTER ENERGY horses about 70% of the time.

THE TURN TIME PIE CHART:

TURN TIME

The Designated Stop Action Screen:

As I have often explained, the horse hitting the 2nd panel FIRST is the one most likely to prevent the other contenders from running to their projected TP, or, if you prefer, 3rd Fraction or Final Time. With this strong a showing and odds of 19 to 1 and keying a \$160.20 Exacta and \$281.20 Trifecta, a horse with this strong a showing in so many different readouts just has to be an across the board bet.

Since QUAD-RATER (called POR/POH in issue #45) has been greatly improved since Follow Up #45, we have added this graphics screen:

EP			FINISH	R
DREAM RACE				
RUN	1 -2.73		0.00-	1 P
SOUTH	2 -1.84		-1.02-	3
MYST	3 -2.27		-1.80-	4 S
MAKEP	4 0.00		-0.04-	2 W

The winner ranks 2nd, the place horse 1st, the show horse 4th. The Exacta (perfecta) pays \$160.20. Not bad fro a box costing \$12. The Trifecta, boxing the top 4 horses (as recommended) pays \$281.20.

Finally, the SPN and ODDS LINE:

Name	1st	2nd	3rd	Edr	Ldr	SPN Total	
RUN2	97.20	96.60	100.00	193.80	196.60	293.80	PL
MAK-P	99.71	100.00	94.04	199.71	194.04	293.75	W
MYST1	100.00	97.07	96.66	197.07	193.73	293.73	Sh
SOUT1	99.53	97.63	96.57	197.16	194.19	293.73	

Name	Probability	Odds
RUN2	.6041	0.66
MAK-P	.1658	5.03 ✓
MYST1	.1042	8.60
SOUT1	.1259	6.94

Wouldn't you bet a horse projected at 5 to 1 going off at 19 to 1? If not, I've got space for you on my Freudian couch. Even the world renowned VALUE BOYS can't criticize this one.

THE RESULTS:

5th Mile, 4-y-o-up, clmg., \$6,250, purse \$7,900:

Horse and jockey	PP	St	1/2	3/4	Str.	Fin.	\$1
Makasumoney (Macias)	7	7	4	4	2-1/2	1-3/4	19.00
Run For Your Honey (Diaz)	1	2	3	3	4-1	2-3/4	1.80
a-Mystical Wizard (Brque)	6	4	2	2	1-hd	3-1 1/2	2.00
Dawns Clever Trick (Meier)	5	5	6	5	5-1/2	4-nk	2.00
Southern Rated (Zuniga)	2	3	5	6	6-2	5-1 1/4	3.10
Alyrivo (Guldry)	8	8	8	8	7-2	6-1/2	9.10
Arctic Minstrel (Hunter)	3	1	1	1	3-1/2	7-4	22.40
Time Please (Guerra)	4	6	7	7	8	8	9.30
Makasumoney	40.00	12.00	5.00	Per. 7-2: \$160.20			
Rn For Yr Hny		4.20	2.80	Tri. 7-2-1: \$281.20			
Mystical Wizard			2.20				

Time—: 1:38 2/5. Winner owned by Doubledown Stable Inc.,
Trainer Wayne M. Catalano
